Position, lat. 15° 0′ S., long. 145° 30′ E.

Also the following information concerning g reef and Sand Bank, lying respectively about 5½ and 7 miles eastward of Two isles :—

g reef, as heretofore charted, does not exist.

Sand bank, now named g reef, is 4 cables in length in an east and west direction, with a width of 2½ cables, it is steep-to, and has a small sandy head near its west extreme which dries 6 feet at low water spring tides ; from this head, cape Flattery summit bears N. 63° W., distant 13$\frac{5}{10}$ miles, and South Direction island N. 18½° W., distant 10$\frac{5}{10}$ miles.

Position, lat. 15° 0½′ S., long 145° 36′ E.

Unsuccessful search for shoal north-west of Look-out point.

FURTHER information has been received that a shoal spit extends in a north-westerly direction from Look-out Point for a distance of 2½ miles, having a least depth of 6 feet, with the summit of the point bearing S. 45° E., distant 2 miles ; it is steep-to on its eastern edge, the water deepening quickly from 2 to 6 and 7 fathoms ; on the north-western side it deepens more gradually.

The position heretofore given for the 2½ fathoms shoal is about 8 cables northward of the extreme of the spit, and depths of 6½ to 7½ fathoms over even ground were obtained around that spot with no sign of shoal water.

Consequent on the foregoing, it is considered that the *Decapolis* grounded on the spit about 2 miles north-west of Look-out point, and the 2½ fathoms shoal has been removed from the Admiralty Charts.

NOTE.—Cape Flattery summit in line with the red beacon on Sand cay (about 2½ miles south-east of Look-out point), bearing S. 38° E., leads eastward of the shoal ground off Look-out point ; and end of range in line with Round hill, bearing S. 82° W., leads 4 cables northward of it.

Prize Essay for Native Ladies.

THE following subject has been selected for Babu Brajamohan Dutt's Prize of Rs. 40 for the year 1889-90:—

"The present condition of Bengali Women."

The conditions for the award of the prize are—

(1) That the competition be open to all educated women, being natives of Bengal, without regard to age.

(2) That the prize be given for an essay, to be written in either Bengali or Sanskrit.

(3) That the essays be sent to the Central Text-Book Committee for adjudication within six months of the date of advertisement.

(4) That each essay be accompanied by the written declaration of the husband, parent, or guardian of the competitor that, to the best of his belief, she has received no assistance of any kind, direct or indirect, in writing the essay.

Candidates are requested to send their essays, not later than the 30th June 1890, to the Secretary to the Central Text-Book Committee, Office of the Inspector of Schools, Presidency Circle, Calcutta. The envelope containing the essay should be superscribed "Brajamohan Dutt Prize Essay." The name of the successful competitor will be published in the *Calcutta Gazette*.

The winner of the prize in any year may, if she pleases, again compete. If she is adjudged to have sent in the best essay in such subsequent competition, her name will be published in the *Gazette*, but the prize will be awarded to the next eligible candidate.

No prize will be awarded if, in the opinion of the judges, the best essay sent in is not such as to deserve a prize.

By order of the Board of Revenue, L. P.,

K. G. GUPTA, *Offg. Secretary.*

BOARD OF REVENUE, L. P., *Fort William, the 3rd December* 1889.

No. 1562B.

CUSTOMS
HON'BLE F. B PEACOCK.

THE following rules, framed by the Board of Revenue under Sections 9 and 105 of the Sea Customs Act VIII of 1878, for regulating the removal of salt warehoused at Chittagong to be re-warehoused at Naraingunge, having received the sanction of the Lieutenant-Governor, are published for general information.

BOARD OF REVENUE, L.P.,
Fort William, the 18th December 1889.

K. G. GUPTA,
Offg. Secretary.

1. When any owner of salt warehoused at Chittagong intends to remove it under section 105 for the purpose of being re-warehoused at Naraingunge, an application in writing, specifying the name, tonnage, and master's name of the vessel intended to convey the salt shall be made to the Collector of Customs, Chittagong, before 3 P.M. on the day prior to that on which it is proposed to remove the salt.

2. The salt shall be conveyed from Chittagong to Naraingunge by such vessels only as are approved by the Collector of Customs, Chittagong. Each vessel must carry a special pass in the annexed form under the signature of the Collector of Customs, Chittagong, covering the consignment of salt shipped in it.

3. The salt can only be removed from Chittagong under a bond to be executed by the bonder in conformity with the requirements of section 106 of the Sea Customs Act. The bond shall be in the form appended to these rules. Port clearance shall not be granted till after the due execution of the bond and after the quantities entered in the tally books have been found to agree with those entered in the manifest (or cargo books) of such vessel or vessels. Single bonds may be accepted for any quantity of salt not exceeding 20,000 maunds, and shall cover all the vessels being loaded with the quantity of salt for which the bond, in each case, is given, and such vessels must, in each case, be named in the bond. The number

and date of the bond are to be noted in the pass which accompanies each vessel, and in the copies of the pass retained by the Collector of Customs, Chittagong, and forwarded to the Collector of Customs, Naraingunge, respectively.

4. When the discharge of salt from the warehouse at Chittagong for conveyance under bond to Naraingunge is interrupted, or not completed, such quantity as has been actually delivered at the time of interruption shall be covered by a Customs boat-note. The salt so delivered must also be completely stamped over, and the hatches and all access to the hold must be sealed by Custom seals, to be examined by the night Customs Inspector, who must record his report of each such inspection.

5. The salt when placed on board must be stamped all over and conveyed under sealed hatches. Both the seals on the hatches and the stamps on the salt as reported on clearance by the Collector of Customs at Chittagong shall be separately examined and reported on by the Salt Darogah or other officer deputed by the Collector of Customs, Naraingunge, to the Collector of Customs, Naraingunge, on receipt of whose orders on the report the seals may be broken and the salt weighed.

6. The vessel on arrival at Naraingunge shall be anchored as close as possible to the ghât leading to the warehouse in which the salt is to be stored, or at the nearest moorings to such ghât.

7. The weighment of the salt shall be made in the presence of the Salt Darogah or other officer deputed by the Collector of Customs, Naraingunge, and a Customs peon shall invariably remain with the salt until the weighment shall have been completed. Weighment of the salt shall be made, as a general rule, on board the importing vessel. It will, however, be competent to the Board, on sufficient cause being shown, to permit the salt of any bonder to be weighed after removal to the shore, under such suitable precautions, to be taken at the sole expense of the bonder, as may be prescribed by the Collector of Customs, Naraingunge, and approved by the Board.

8. The owner of the salt shall be required to pay full duty on any difference between the quantity of salt weighed out of bond at Chittagong and the quantity weighed out of the brig or steamer at Naraingunge, less an allowance of one per cent. on the quantity weighed into each vessel for wastage during the passage, if such wastage actually occurs.

9. The salt shall be stored under proper supervision in a licensed warehouse immediately the weighment shall have been made. The door of the warehouse shall have two locks; the key of one lock (which must be a Chubb's lock) shall remain with the Darogah or other officer deputed by the Collector of Customs, Naraingunge, and the key of the other with the bonder's agent.

10. The bonder will be required to defray the cost of the preventive officers, and all charges attendant on the weighing of the salt, both at Chittagong and Naraingunge, such weighments being conducted as laid down in the Board's rules for weighing salt intended for bond at Chittagong.

11. Both Customs officers and the exporter's agent will be required to certify at the end of each day's weighment the correctness of the tally books for that day's work.

12. The working hours with regard to delivery and weighment of salt shall be from 6 A.M. to 3 P.M., or such other hours as may be fixed from time to time by the Collector of Customs, with the approval of the Commissioner.

13. If from any cause the weighments cannot be completed in one day, extra peons as may be considered necessary by the Collector of Customs shall be appointed to guard the salt, the cost being borne by the bonder.

14. The duty on the warehousing bill-of-entry shall be calculated on the whole quantity delivered on weighment from the vessel or vessels covered by the bond. As salt is cleared from bond, the quantity as entered in the clearance bill-of-entry shall be noted on the warehousing bill-of-entry and duty paid accordingly. When the last quantity of salt under each bond is cleared, the bonder shall make good the deficiency, if any, between the amount of duty originally entered in the warehousing bill-of-entry and the total amounts of duty paid, less an allowance on account of wastage, if such wastage has actually occurred, which shall not exceed 2½ per cent. on the whole quantity warehoused.

15. In addition to the above rules, the rules contained in sections VII and IIX of the Salt Manual shall apply generally to all salt conveyed under bond from Chittagong and warehoused at Naraingunge.

16. Before permission can be given to transport salt warehoused at Chittagong to Naraingunge, under bond, the bonder will be required to construct a suitable warehouse at Naraingunge, to be approved by the Collector and licensed by the Chief Customs authority, together with suitable accommodation for the warehouse establishment, also to be approved by the Collector. The bonder will also be required to enter into an agreement with the Collector to defray the cost to Government of the establishment noted in the margin, which will be appointed by the Collector for the guard and supervision of the warehouse.

	Rs.
1 Darogah on	50
2 Peons at Rs. 6 each ...	12
Cost per monsem	62

17. The rules contained in paragraphs 5, 11 and 18 of section II of the Salt Manual shall apply generally to the appointment and payment of this establishment, and to the construction and repair of the warehouse and establishment accommodation.

These rules shall come into force from 1st January 1890.

JUDICIAL.

No 1083.—G. G. O. No. 1066, dated the 20th December 1889, is republished for information :

Dated the 20th December 1889.

No. 1066.—The following draft of proposed rules under section 26, clause 21, of the Cantonments Act, 1889, is, as required by section 27 of that Act, hereby published for the information of persons likely to be affected thereby.

The draft will be taken into consideration on the expiry of three months from the date of this notification—

DRAFT RULES.

Under section 26, clause (21), and section 27, sub-sections (2) and (4), of the Cantonments Act, 1889, the Governor-General in Council is pleased to make the following rules, and to direct that they shall be general for every cantonment in British India :—

1. As many hospitals as may be necessary, within or without the limits of the cantonment, as the Cantonment authority with the concurrence of the District Magistrate may determine, shall be maintained at the expense, wholly or in part, of the Cantonment Fund, for the treatment of persons suffering from infectious or contagious disorders.
2. A medical officer, to be appointed in such manner as the Local Government may direct, shall be in charge of every such hospital.
3. A person admitted to such a hospital shall be treated gratuitously, and if such person is without means of support, and is either a resident of the cantonment or was admitted to the hospital on the request of the Cantonment authority, or of any officer of that authority, shall receive from the Cantonment Fund such subsistence allowance, not being less than the lowest allowance for the time being fixed by the Local Government under section 338 of the Code of Civil Procedure, as the Cantonment authority may determine.
4. If the medical officer for the time being in charge of a hospital maintained under these rules for the treatment of person suffering from any infectious or contagious disorder, certifies in writing to the Commanding Officer of the cantonment that any person is suffering, or is supposed by such medical officer to be suffering, from the disorder, and such person either refuses to go to the hospital, or, having gone to the hospital, leaves it before such medical officer has pronounced such person to be free from the disorder, the Cantonment Magistrate may, on the application of such medical officer, order such person to remove from the cantonment within 24 hours, and prohibit such person from remaining in or re-entering it without the written permission of such medical officer.
5. If a person having been prohibited under the last foregoing rule from remaining in or re-entering a cantonment, remains in, or re-enters the cantonment without such written permission as is mentioned in that rule, such person shall be punished with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days, for every breach of the said prohibition.

Balasore Collectorate, the 2nd December 1889. R. CORNISH, Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate, situate in the district of Bankoora, will be put up to sale at the Bankoora Collectorate on 13th January 1890, corresponding 1st Magh 1296 B S.

The purchasers will be subject to the following conditions of sale:—

Conditions of Sale.

1*st*.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings, and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3*rd*.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4*th*.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale:—

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd. If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.— If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Burdwan Collectorate, the 28th November 1889.

NOTICE is hereby given that or the undermentioned plots of the Nizamut lakhraj State lands situated in the district of Burdwan, Nos. 72 to 75 will be put up to sale on the spot by the Deputy Collector at the Burdwan Collectorate, and No. 89 by the Sub-divisional Officer of Culna, on Monday, the 27th January 1890, corresponding to 15th Magh 1296 B. S.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1. The lands to be sold revenue-free to the highest bidder above the upset price, which will be fixed for each plot at the time of sale.

2. The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and the purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3. If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4. If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the lands to be again put up to sale at the risk of the defaulting purchasers, after issue of advertisement, as in the case of original sale.

5. The purchasers shall be put in possession on receipt of the orders of the Collector approving of the sales, but such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

NOTICE.

IT is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,
Under-Secy. to the Govt. of Bengal.

The 24th November 1886.

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

The HON'BLE RAJA RAMESHWAR SING BAHADUR.

NEW MEMBER.

The Hon'ble F. B. Peacock took his seat in Council.

STATEMENT OF THE COURSE OF BUSINESS.

His Honour the President said:—"I hesitated about calling you together before, for, until the Report of the Select Committee on the Calcutta Port Bill was in our hands, I really had nothing to lay before you, and even now the programme of business which I have to ask you to consider is a very short one, and I do not think it ought to detain us over many meetings. The first item in to day's programme is in connection with the Rules for the conduct of business. You will recollect that on two or three occasions last year we found ourselves inconvenienced by the existing Rules; and, with the assistance of Mr. Reily, I have gone through them, and I venture now to circulate a paper for your consideration. You have that paper before you, and I do not think I need further revert to the points contained in it. But I propose to ask a Select Committee to consider these amendments, and any others which may occur to them, for improving the working of the Council.

"The next item is an amendment of the Bengal Vaccination Act, 1880, and Act II, 1887. This is a purely formal matter. The rules under which vaccination is now conducted in Calcutta are based upon the Act of 1880, in which the definition of 'Calcutta' is the old definition conterminous with the original jurisdiction of the Calcutta High Court. Since then the boundaries of Calcutta have been extended by the inclusion within it of the Suburbs: it is therefore necessary to alter the definition in accordance with the terms of the new definition in the Calcutta Municipal Consolidation Act, 1888.

"The alterations made in the Calcutta Port Bill, which has been carefully considered by the Select Committee, will be explained to you by the Hon'ble Sir Henry Harrison, the Mover of the Bill, in the motion which he has to make to-day. It is the only Bill before the Council in which it seems to me there will be any room for debate, and I have no doubt it will have your careful consideration."

RULES FOR THE CONDUCT OF BUSINESS.

His Honour the President moved that a Select Committee, consisting of the Hon'ble Sir Charles Paul, the Hon'ble Messrs. Nolan and Allen, the Hon'ble Sir Henry Harrison, and the Hon'ble Dr. Rash Behary Ghose, be appointed to consider and amend the rules for the conduct of business at the meetings of the Council.

The Motion was put and agreed to.

BENGAL VACCINATION BILL.

The Hon'ble Sir Henry Harrison moved for leave to introduce a Bill to amend the Bengal Vaccination Act, 1880, and Act II, 1887. He said:—

"This Bill is a purely formal one. The present Act provides three areas for which different rules may be prescribed, viz., the old Town of Calcutta, the late Municipality of the Suburbs, and the rest of Bengal to which the Act may be extended. But since the passing of the new Municipal Act, the Town of Calcutta, as well as a large portion of the Suburban area, have been placed under the same administration, whilst the rest of the old Suburban area is assimilated with all the other municipalities in Bengal. It is therefore desirable that the definitions in the Vaccination Act should be so altered that instead of three areas, there should be only two, viz., that of the amalgamated Town of Calcutta, and that portion of the Suburbs which was formerly in the Suburban Municipality, but is now split up into separate municipalities, in conjunction with all other portions of the Province to which the Act has been extended, or may from time to time be extended. The Bill seeks to legalize these new definitions."

The Motion was put and agreed to.

CALCUTTA AND SUBURBAN POLICE SUPERANNUATION FUNDS BILL.

The Hon'ble SIR HENRY HARRISON presented the Report of the Select Committee on the Bill to consolidate the Calcutta and the Suburban Police Superannuation Funds. He said:—

"This Bill has been before the Council for some time, and the Select Committee in preparing its report have not found it necessary to make any material changes; the amendments which they have proposed being little else than verbal: therefore it is not necessary for me to detain the Council to explain the report further."

CALCUTTA PORT BILL.

The Hon'ble SIR HENRY HARRISON presented the Report of the Select Committee on the Bill to consolidate and amend the law relating to the Port of Calcutta, and to the appointment of Commissioners for the said Port. He said:—

"This measure has received the best attention of the Select Committee, and they have proposed certain changes which are worthy of attention, although the substance of the measure remains untouched.

"The first important change proposed is to give one additional member to the Bengal Chamber of Commerce, the number of members having been increased from 13 to 15. It was said that the Chamber of Commerce was not sufficiently represented by four members, and that it was desirable that the number should be increased to five, so that the five branches of trade in Calcutta might be represented. This has been included in the Bill as amended by the Select Committee, and at the same time inasmuch as the Corporation of Calcutta would probably elect one native gentleman to represent them, and as the body which represents the commercial interests of the native community would also probably elect one, it was thought unnecessary to retain the provision that two of the members of the Port Commissioners must be natives.

"The next important amendment which the Select Committee have proposed is the introduction of sections regarding the valuation of the Port Trust property for the purposes of municipal assessment. Recently a question arose as to the proper assessment of the Dock property pending the completion of the Docks, and the Port Commissioners thought it right to consult the Hon'ble the Advocate-General as to the valuation proposed. In giving his opinion on the question referred to him, the Hon'ble the Advocate-General drew attention to the fact that the present Calcutta Municipal Act did not contemplate the valuation of property such as the Docks, that it was hardly adapted for that purpose, and that it was very uncertain how the Courts would interpret the law; and he suggested that it would be wise to introduce a short Act for the purpose of deciding this question.

"It was thought by the Select Committee that the amendment and consolidation of the Port Trust Act would afford the best opportunity for doing so, especially as there was a precedent in the case of Bombay, where for many years past the Port Trust Act has contained provisions regulating the valuation of the Port Trust property.

"The Select Committee have accordingly introduced several new sections embodying the proposals which they have to lay before the Council. The most important changes which they have proposed are that the Local Government, in preference to any Court of Law, should be the arbiter between the parties in the case of their not jointly agreeing to a valuation, and that a reduction of 10 per cent. should be allowed on the amount payable by an ordinary owner in consideration of the special circumstances of the Port Trust property, which in many respects entitles it to consideration in respect of municipal rating. The other consideration is that the true profit made by the Port Trust as the owner of property is that which they have to earn in order to pay interest upon the capital sunk in constructing the Docks and other works, and therefore the best and fairest method to follow is to take this interest as being the income earned by the Port Trust as an owner of property, and to treat it in the same way as capital invested in other parts of the town

is treated, viz., to take 5 per cent., which is substantially the interest which the Port Trust is paying, although they are paying various rates of interest, as the annual value upon which the municipal assessment should be fixed.

"In regard to the submission of the annual budget, we have introduced a clause making it obligatory on the Port Commissioners to submit it before the close of the preceding year. This has always been done, but, as a matter of fact, the Bill as it stood, as has been pointed out by the Government of India, did not make it obligatory on the Port Commissioners to do so, and therefore, so far as the law is concerned, this omission has been supplied, and the period within which the Local Government should pass orders on the budget has been extended from two to three months; two months being considered too short a period.

"Then the next section which has attracted attention is section 76 of the Bill (now section 85), regarding the method of dealing with private wharves and jetties outside the limits of the Port which may hereafter be brought within it. In regard to this matter one of our Colleagues has prepared a carefully written minute of dissent which has been concurred in by another Member of the Committee. As that minute explains the matter at issue between us, it is not necessary for me, in presenting this Report, to make any lengthened observations upon it; the dissent being in the hands of the Members.

"Then in sections 92 to 96 we have thought it necessary to increase the powers of the Local Government in dealing with the scale of charges. Hitherto the Lieutenant-Governor had power in the first instance, when a scale of charges was submitted to him, to approve or disapprove, or to modify it; but the scale having been once approved, there might be a difficulty at any future time, if considered advisable, in exercising the power of modifying it. Questions do arise at times, especially such questions as the tramway charges, which affect the public outside very largely, in which charges once sanctioned might at a later period become injudicious; and in order that the Government might have the full right as it were to arbitrate between the Port Trust and other bodies who may be interested, such as Railway companies, the Bill has been so modified as to enable the Local Government at any time to modify any scale of charges and require it to be altered in accordance with the interests of the public at large.

"These are the only changes of importance which the Select Committee has made in the Bill; the others being for the most part verbal alterations or alterations which explain themselves."

The Council adjourned to Saturday, the 4th January, 1890.

TEXT-BOOKS FOR VERNACULAR MEDICAL SCHOOLS.

GENERAL DEPARTMENT.

Calcutta, the 30th December, 1889.

RESOLUTION.

READ—

A letter from the Director of Public Instruction, No. 6937, dated the 13th December, 1889, and its enclosure, regarding text-books for Vernacular Medical Schools.

Read again—

Government Resolution, dated the 13th December, 1880, on the same subject.

The Director of Public Instruction has recommended the adoption of (1) "The Practice of Medicine" in Urdu by Assistant Surgeon N. C. Chakravarti, and (2) Honorary Surgeon Rahim Khan, Khan Bahadur's "Physiology," also in Urdu, as text-books in the Patna Medical School. The Lieutenant-Governor accepts the recommendation, but at the same time reserves to Government the right to substitute hereafter for the former work a translation, should one be made and approved, of Roberts' Hand-book of Medicine.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Director of Public Instruction for information.

Ordered also, that a copy of this Resolution be published in the *Calcutta Gazette.*

P. NOLAN,

Secretary to the Govt. of Bengal.

BHADOI AND WINTER RICE CROPS IN BENGAL, 1889.

The 31st December, 1889.—The following papers are published for general information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,
Secretary to the Govt. of Bengal.

FORECAST OF THE OUTTURN OF THE WINTER RICE CROP IN BENGAL, 1889.

1. *Character of rainfall as affecting the crop.*—The distribution of rainfall most favourable to the winter rice crop is when premonitory showers fall in May or early in June. The rain in the end of June and in July should be heavy: then should come an interval of comparatively fair weather, in which weeding operations may be successfully prosecuted. The September rains must be heavy, shading off into fine weather with October showers. On the sufficiency of the September rains, more than of any other month, depends the character of the winter rice crop—the chief harvest in these provinces. In May and the early part of June of the present year, when the paddy lands are usually prepared and sown, there was a general deficiency of rain in Central and in many parts of Eastern Bengal, in all the districts of the Patna Division except Patna and Durbhunga, in Maldah, the Sudder subdivisions of Pooree and Balasore, and in Hazaribagh. It is reported that this deficiency retarded the cultivation of rice land, or prevented the sowing of early varieties of rice in the Cutwa and Culna subdivisions of Burdwan, Midnapore, Hooghly, the Sudder subdivision of Howrah, Baraset and Basirhat subdivisions in the 24-Pergunnahs, the Sudder, Chooadanga and Ranaghat subdivisions in Nuddea, the Sudder and Bongong subdivisions in Jessore, the Sudder and Lalbagh subdivisions in Moorshedabad, Khoolna, Dacca, the Serajgunge subdivision in Pubna, Backergunge, Tipperah and Noakhally; also in the Sudder subdivisions of Balasore and Pooree.

2. In July, August, and the beginning of September, when the seedlings are usually transplanted, and paddy is in full growth, the crop is reported to have been damaged by deficiency of rain in many parts of Central Bengal, and unfortunately many of these places were the same that had been affected by deficiency of rain at sowing time. The tracts specially affected in this way are the Culna and Cutwa subdivisions in Burdwan, the Sudder and Lalbagh subdivisions in Moorshedabad, the Sudder, Chooadanga, and Ranaghat subdivisions in Nuddea, the Bongong and Sudder subdivisions in Jessore. The crop also suffered somewhat from deficiency of rain at this period in Patna, Chumparun, South Bhagulpore, Maldah, and the Sonthal Pergunnahs; in the Sudder subdivision of Balasore, in Hazaribagh, and in the Palamow subdivision of Lohardugga. It suffered, on the other hand, from excess of rain during the same months in Rungpore, Mymensingh, Julpigoree, and North Bhagulpore.

3. The third critical period in the cultivation of paddy extends over the latter part of September and the month of October, when the crop is in flower, and requires showers to enable it to mature. In Central and Eastern Bengal the rainfall was favourable during this period. But want of rain was more or less felt in all the districts of the Patna Division, in Monghyr and South Bhagulpore, in Palamow, Govindpore (Manbhoom), and in Singbhoom. A cyclonic storm swept over the Orissa coast on the 20th November, which was followed by heavy rain in Orissa, rather heavy rain in South-West and East Bengal, and moderate but general rainfall over the remainder of the province. This unusual fall is reported to have caused damage to the rice crop in Pooree, and in the Balasore, Cuttack, and Singbhoom districts, it may be said generally that the unusual rains of November injured the early varieties of rice where they were then ripening, but either did no harm to, or benefited, the later varieties.

4. *Floods.*—Floods caused loss in the Meherpore subdivision in Nuddea, the Sudder, Lalbagh, and Jungipore subdivisions in Moorshedabad, the Gaibanda subdivision in Rungpore, Pubna, the Munshigunge and Maniekgunge subdivisions in Dacca, and parts of Furreedpore; also in the Sudder and Dinapore subdivisions in Patna, the Sudder and Hajeepore subdivisions in Mozufferpore, the Sewan subdivision in Sarun, and the Sudder subdivision of Purneah, and in Pooree. In parts of the Contai subdivision, in Midnapore, some damage was caused by defective drainage.

5. *Insects.*—Damage by insects is reported only from Backergunge.

6. *Distressed areas.*—An 8-anna crop is believed to be sufficient to enable the people to tide over a year of short harvest; the outturn of the current year, as estimated by Collectors, and the estimated outturn of last year in the tracts of seriously deficient harvest, are—

Place.	Estimated outturn this year in annas.	Outturn of last year in annas.

Moorshedabad—		
Sudder	8	9
Lalbagh	10	10
Balasore—

7. It will be observed that the areas of bad harvest in Central Bengal (Burdwan, Hooghly, Nuddea, Jessore, 24-Pergunnahs, and Moorshedabad) are all situated in a block, in close proximity to one another. In some of them the harvest was short last year, and in none was it what might be called a good one, so that there cannot be large stores of grain in stock; but all these areas enjoy special facilities for importation, and being close to Calcutta and other manufacturing centres, the inhabitants of them are comparatively prosperous. There is reason to believe that the outturn in Cutwa and Culna has been under-estimated. Though there is cause for exercise of vigilance on the part of the local authorities in the subdivisions named above, it may yet be hoped that there will be no actual distress.

8. In most of the chief rice-growing districts an average, and in some more than an average, crop will be reaped. Looking to the vast extent of country under rice in Bengal, aggregating over fifty-two thousand square miles, and to the widely different conditions of soil, some highly and some lowly situated; and having regard to the varying conditions of climate which prevail in different parts of these provinces, it must always be expected that the crop will suffer in some particular tracts, either from deficiency of rainfall on the one hand, or from excess of rain and floods on the other. The present year is not exceptional in this respect. For the province as a whole, it may be said that the rice crop is far better than that of last year, and that on the whole an average, or nearly an average, crop may be expected.

9. In the statements annexed the estimated outturn for each district is given, and a detailed examination of the statistics of rainfall in each district is made with special reference to the reported estimated outturn. These estimates have been prepared by Collectors of districts after consulting zemindars, European residents, and other local reporters. They have not, however, it is necessary to repeat, any pretensions to statistical accuracy.

10. Following the nomenclature prescribed by the Government of India, 20 annas is taken to represent a bumper crop, 16 annas an average, and 12 annas three-fourths of an average crop.

M. FINUCANE,
Director of the Dept. of Land Records and Agriculture, Bengal.

CALCUTTA,
The 24th December 1889.

STATEMENT I.—*Estimated outturn of winter Rice crop now being reaped.*

DISTRICT.	Sub-division.	Total area of sub-division in square miles.	Total area estimated to be under cultivation in square miles.	Estimated area under winter rice, aman or hymanti, in square miles.	Estimated outturn of this year's winter rice crop expressed in annas.*	Outturn of winter rice of previous year expressed in annas.	REMARKS BY THE AGRICULTURAL DEPARTMENT, BENGAL.
Burdwan	Sudder ...	1,242	993	486	9 annas	10 annas	
	Raneegunge	671	398	352	13 „	10 „	
	Cutwa	352	265	88	4 „	10 „	*Burdwan.*—In the Sudder sub-division the rainfall was sufficient in May, June, and July: it was very deficient in August (the actual rainfall being only 5·09 against the normal fall of 12·38 inches), and this deficiency largely interfered with transplanting operations. In September the rainfall was sufficient, and the ryots must have tried to complete the transplanting of lands that could not be planted in the preceding month; but unfortunately there followed dry weather in October with a fall of only 1·44 inches against the normal of 4·40 inches. The early varieties of paddy which ripen in November were injuriously affected by this drought, and still more so by the unusually plentiful showers which fell in the first and third weeks of November. The late varieties which mature in December must have been affected by insufficiency of rain in October, but the late rains of November instead of being injurious to them, would appear to have been beneficial, and partly counteracted the evil effects of short rain in October. The Collector's return of a 9-anna crop for the Sudder sub-division appears to be justified by a consideration of the statistics of rainfall.
	Culna	432	330	176	7 „	10 „	In the Cutwa sub-division the rainfall was very deficient in May and in the first-half of June, but was normal in the last half of June and in July. It is probable that want of early rain interfered with the preparation of land for broadcasted paddy. The transplanting season (August and September) was characterized by short rains (13·9 inches against the normal fall of 20·89 inches). Thus the season was unfavourable to both broadcasted and transplanted paddy. In October the rainfall was also slightly deficient (2·61 inches against 3·85 inches). The unusually heavy rains of November undoubtedly injured the early varieties which were then ready for the sickle, while they may have benefited the later varieties. The Collector's estimate of 4 annas appears to be unduly low. In the adjoining districts of Nuddea and Moorshedabad the estimated outturn is nowhere below 8 annas. It is therefore probable that in Cutwa the outturn has been somewhat under-estimated. The actual outturn will probably be 6 to 8 annas. There is cause for exercise of vigilance on part of the authorities in this and the Culna sub-division.
							In the Culna sub-division the character of the rainfall was analogous to that in the Sudder sub-division, with this exception that it was more deficient in July and August at the time of transplanting in the former sub division than in the latter. A low outturn of 7 annas for Culna is therefore reasonable
							In the Raneegunge sub-division the character of the rainfall has been uniformly favorable excepting in August, which had a slightly deficient rainfall. In October the fall was deficient, but the deficiency can not have done much harm, as there was sufficient rain fall in September and plentiful rain fell early in November. A full average crop is likely to be reaped. The Collector's return is 13 annas. The recent rains in November do not appear to have affected the paddy crop, although abnormally heavy (9·53 inches against 0·13 inch). Taking the Burdwan districts as a whole, it would appear that the rainfall has been more or less unfavourable to transplanted paddy except in the Raneegunge sub division, and also to broadcasted paddy in the Cutwa sub-division. The late rains of November appear to have slightly improved the prospects of the crop. Not more than a 10-anna crop, as the Collector estimates, can be reasonably expected for whole district. The area under rice in Culna and Cutwa, which appears to be seriously affected, bears a small proportion to the total rice area of the district (263 miles against 1,101 miles).

Beerbhoom	Sudder	1,108	777	604	..	16 annas	The rainfall was generally favourable to the rice crop in this district. Though somewhat deficient in August (8·96 as against normal, 13·77), it was yet sufficient for the transplanting operations. In October the rainfall in the Rampore Hât subdivision was less than the norma, being only 0·64 against 3·69; but as there was copious rain in September and again in November, the crop did not suffer. An excellent outturn may therefore be expected. Taking 16 annas to represent an average crop, the outturn of this year is estimated at 18 annas.

In August the fall was somewhat below the normal, but yet sufficient. The comparatively short outturn is attributed in the Sudder, Ghatal, and Tumlook sub-divisions to short rains in May and the early part of June. The Collector estimates the outturn at 15 annas. The reason of the difference in the estimated outturns of the various sub-divisions is not apparent. The outturn of the whole district is probably under-estimated.

Nuddea.—The Collector returns an 8-anna crop for the Sudder, Chuadanga, and Ranaghat sub-divisions, and a 12-anna crop for the Meherpore and Kushtea sub-divisions. The conditions of rainfall in the Sudder and Chuadanga sub-divisions were the same as in the Cutwa sub-division of Moorshedabad, namely, great deficiency in May and early June at the time of preparing the rice lands, and again in August and September at the time of transplantation. In May there was only a fall of 1·51 inches against 6 26 inches in the Sudder, and 1·95 inches against 7 56 inches in the Chuadanga sub-division; and in August and September there were 13 18 inches against 21·39 inches in the former, and July and August, 15 21 inches against 22 77 inches in the latter The deficiency of rainfall at these critical periods must have seriously affected the crop. An estimate of an 8 anna crop in the Sudder sub-division seems to be reasonable, but a slightly higher outturn is likely to be obtained in the Chuadanga sub-division.

The statistics of rain fall recorded at Ranaghat Station show some deficiency in May; but since then, there does not appear to have been want of rain. In June, September, and October the rainfall was in excess of the normal The Collector remarks that the crop was injuriously affected by want of rain at sowing time, and also at the time of transplantation: the rainfall statistics do not bear out the latter statement If the distribution of rainfall over the sub-division is to be judged by the fall recorded at Ranaghat, the Collector's estimate of 8 annas would appear below the mark, but looking to the reported prospects of the rice crop in the neighbouring sub-divisions of Culna, the Sudder sub-divisions of Nuddea and Chuadanga, a better crop than 8 annas in the Ranaghat sub-division cannot, probably, be looked for.

The distribution of rainfall in the remaining two sub-divisions—Meherpore and Kushtea—was favourable to the rice crop except in May when the fall was short of the normal, but the deficiency was made up by ample rain in June. In Kushtea there had been deficiency of rain in October, which was compensated for by the showers which fell in the first week of November. The Collector's estimate of 12 annas is fully borne out by the rainfall statistics. In the Meherpore sub-division a full average crop, or at any rate a 14-anna crop, could have been reaped but for damage caused by floods. A ten-anna crop for the Nuddea district as a whole may be accepted. The Collector in a recent telegram estimates the outturn for the whole district at 8 annas, reducing the previous estimate by two annas.

The conditions of rainfall in the Bongong sub-division were unfavourable to the rice crop. The fall in May was very deficient, being only 1·23 inches against a normal fall of 5·42 inches. It was again very deficient in August and September, being only 10 14 inches against a normall fall of 21 31 inches. Under these circumstances more than a 10-anna crop as estimated by the district officer cannot be looked for

In the Sudder sub-division the conditions of rainfall were similar to those obtaining in Bongong, but somewhat more favourable. In May there were only 2 14 inches out of a normal fall of 7·43 inches, and in August only 7 17 against 11 76 inches. The Collector's estimate of a 16-anna crop, therefore, seems to be much above the mark: 12-annas seems to be a more reasonable estimate.

In the remaining sub-divisions of Narail, Jhenidah, and Magoora, the season proved favourable on the whole, and a full average crop may be expected.

The Collector estimates the rice crop in the Sudder and Lalbag sub-divisions at 8 annas and 10 annas respectively. He attributes the short crop to want of rain at the ploughing and sowing time (*i.e* May and June), and to subsequent damage by floods There can be no doubt that disastrous floods caused damage in many parts of these sub-divisions; but the statistics of rainfall do not bear out the statement that there was deficient rain in May and June. At Berhampore 7·76 inches of rain fell in May against the average fall of 4 95 inches, and 10 12 inches fell in June against the average of 9 29 inches. At Lalbagh 5·39 inches in May and 5·78 inches in June were recorded against 4 84 inches and 8 18 inches respectively The rainfall recorded at Lalbagh in June fell somewhat short of the average, but with the plentiful rain of the preceding month it should have been sufficient for the purpose of cultivation. While the rainfall of May and June appears to have been quite sufficient, the rainfall in August at the time of transplanting the paddy seedlings, and in October, when the paddy was in flower and was in need of moisture, was insufficient in both the Sudder and Lalbagh sub-divisions, as shown by the following figures:—

	August.		October.	
	Inches.	Inches.	Inches.	Inches.
Lalbagh	7 36 against	12 71	6 67 against	10·91
Sudder	2·43 against	4 26	1·31 against	5 20

It is not stated over what area the damage was caused by floods.

In the remaining two sub-divisions, the Collector estimates the yield at 18 annas, which may be accepted, seeing that the rainfall was all that could be desired.

The first estimate of the rice-crop for the district as a whole was 13½ annas, but this has been recently reduced to 12 annas This may be due to losses caused by the abnormal rains of November, but is not so stated.

* 20 annas represents a bumper crop, 16 annas an average crop, and 12 annas a three fourths of an average crop.

This includes Sunderbans, 2772 91 square miles, appertaining to this district.

This improvement is probably due to the rain which fell in November. The rainfall was in excess of the normal in June and July. Dacca	Sudder	1,366	673	422	14 annas	16 annas	The distribution of rainfall was favourable to the winter rice crop throughout the district. But the Collector's estimate is 3 annas below the average. Among the causes for the deficient outturn are given want of rain at the time of sowing. This is not borne out by the statistics of rainfall. In May and June the mean rainfall of the district was 8·16 inches and 21·53 inches against the average of 8·70 inches and 12·91 inches respectively. There was, however, a deficient fall in April (2·48 inches against 4·50 inches), that may have interfered with the preparation and sowing of the low lands which require to be sown very early in the season. Early rise of the rivers and high floods to some extent injured the crop; the abnormal rains of November also caused damage to the extent of one-anna in each sub-division.

In submitting his previous estimate, the Collector remarked that the sudden rise of water after sowing caused some damage, which was, however, more than compensated for by the late rains in the beginning of November. Assuming this to have been the case, it is not yet clear why the rice-crop should fall below the average. There was a slight deficiency of rainfall in April and May as compared with the normal falls of those months, which may have caused some injury. The Collector's estimate is probably under the mark.

The excess was specially marked in the Netrokona and the Sudder sub-divisions. To this the Collector attributes the short outturn (12 annas) in the Netrokona sub-division. In the rest of the district the excess rainfall is not stated to have caused any damage, but considering that rain fell at Mymensingh on 28 days out of 30 in June and on 27 days out of 31 in July, it appears probable that excessive rainfall did some damage to the crop. The Collector's first estimate was 15 annas for the whole district; his subsequent estimate is a 16-anna crop. On the whole an average crop may be expected.

Patna	Sudder	617	457	216	14 annas	10 annas	The rainfall in the Sudder sub-division was seasonable and sufficient. In July there was a slight deficiency (8·84 inches against a normal 11·59 inches), but the fall still sufficient for rice cultivation. A bumper crop would be reaped but for the fact that rain withheld altogether from the 24th of September to the 24th of October, *i.e.*, during the *katiya*, when it was urgently wanted. A 15-anna crop is a reasonable estimate.

This may have affected the sowings to a slight extent. There was no rain during the *katiya* which must have further affected the outturn, but the Collector does not notice this fact. Taking the above facts into consideration, viz., damage by flood, slight deficiency of rainfall in May, and drought in October, a 12-anna crop, as estimated by the Collector, may be accepted.
	District Total ..	2,079	1,373	794	12 annas	6 annas	In the Barh sub-division the conditions of rainfall were not altogether favourable. In August and September the fall was much below the average, only 11·36 inches against an average of 17·68 inches. In October want of rain was beginning to be felt, but timely showers fell on the 8th and 11th of the month. The Collector's estimate for this sub-division is a 13-anna crop.
							In the Behar sub-division the season was not altogether favourable; the fall was slightly deficient in May, and also in September and October. During the two latter months, 5·48 inches and 6·36 inches were recorded at Behar against the corresponding averages of 6·38 and 3·96 inches respectively. The drought which occurred during the *katiya* was, however, partially relieved by rain on the 11th of October. The conditions of rainfall, so far as they can be judged from the meteorological returns, were only slightly, if at all, more unfavourable in the Behar than in the Barh sub-division. The Collector's estimate is, however, 11 annas for the Behar sub-division, which is 2 annas less than in the Barh sub-division.
							The Collector's first estimate for the whole district of Patna was a 13-anna crop; his present return is 12 annas, which may be accepted.
Gya	Sudder	1,539	1,434	968	12 annas	6 annas	Taking the district as a whole, the rainfall was deficient in May (·30 inch against 1·74 inches). This deficiency affected the rice crop to a certain extent. Again there was no rain during the *katiya*. Under the circumstances, a 12-anna crop, as estimated by the Collector, may be expected.

Shahabad	Arrah	915	778	389·25	14 annas	12 annas	The rainfall was deficient throughout the district in May and the early part of June, but the want of rain at sowing time is noticed by the Collector only in respect of Arrah and Bhabua sub-divisions. Again, in the latter part of September and in October there was no rain in most parts of the district. About an inch of rain was, however, recorded at Arrah, and a little less than half an inch at Buxar. This probably prevented any loss of crop in the Arrah sub-division. No rain fell at Bhabua till the 22nd October. The Collector's estimate of a 14-anna crop for the entire district may be accepted.

In the middle of November, the rainfall exceeded the average at many stations, but was not so heavy as to injure the crop. It is probable that the late varieties of rice which were yet green and fresh were benefited.
Durbhunga	Sudder	1,222	929	585	17 annas	6 annas	A 17-anna crop is expected in this district. The season was, as the Collector observes, very favourable to the rice crop excepting during the *katiya*, when rain was wanting. Some rain fell, however, in the Sudder, Tajpore, and probably in the Madhubani sub-divisions early in October. The abnormal rains which fell in the middle of November over Orissa and Central Bengal were practically not felt in North Behar.

Mozufferpur	Mozufferpur	1,216	957·08	602·32	12 annas	8 annas	The rainfall in May was deficient (·61 inch against 2·51 inches). The Collector does not notice whether this affected the rice crop in any way. Subsequently the rainfall was sufficient, and even in excess of the normal till the third week of September, since which time there was no rain till the middle of November. The absence of rain during the *hatiya* has affected the crop throughout the district. The damage was further aggravated by floods in the Sudder and Hajeepur sub-divisions. Leaving out of consideration the deficiency in May, which cannot do much harm if closely followed by sufficient rain in June, the rainfall was wholly favourable, and a full average, if not a bumper crop would have been reaped but for the failure of *hatiya* rain. The Collector's estimate of the crop at 14 annas appears reasonable. There was very little rain in the middle of November (·11 inch), and it cannot have affected the crop in any extent.

In August, however, the fall was short of the average (6·27 inches against 12 18 inches). This would appear to have interfered with transplanting operations, but no mention of this is made in the reports. Want of rain in October was greatly felt. The Collector's estimate of a 16-anna crop seems to be a little above the mark.

In the last week of September and the whole of October, there was no rain in the district with the exception of Begusarai, where a slight fall (·45 inch) on the 11th and 12th of October must have done good to the crop. The Collector estimates the outturn at 16 annas in this sub division, and 12 annas and 14 annas respectively in the Sudder and Jamui sub-divisions, the average for the whole district being 14 annas. The fall in November was very slight—only ·12 inch.

Bhagulpore	Sudder	936	655	550	11 annas	7 annas	In South Bhagulpore, including the Sudder and Banka sub-divisions, the Collector's estimate is an 11-anna crop. The short harvest is attributed by him to deficiency of rainfall at the time of transplanting. There was a deficient fall in August (6·67 inches against 12·23 inches), which must have affected the crop to a certain extent; but as it was preceded by good rain in July and followed by a copious fall in excess of the normal in September, the loss on this account could not have been as much as 5 annas. There was general absence of rain in the latter part of September and in October, and to this cause the short outturn is mainly due.

To this excess the Collector attributes some loss in the Soopole sub-division. In October the fall was sufficient in the Madehpura sub-division, but very deficient in Soopole. A 16-anna crop, as estimated by the Collector may be reaped in Madehpura, but it may be doubted whether a 14-anna crop will be reaped in Soopole.

The general absence of rain during the *hatiya*, complained of from most districts of Behar, was not felt in Purneah In the Sudder sub-division loss to the extent of 4 annas is said to have been done by floods; on the other hand, early floods did good to the crop in the Arrareah sub-division. No rain fell in November in this district. The outturn for the whole district is estimated at 15 annas.

Although the fall in September was in excess of the normal, the deficiency in the previous months must have seriously affected the crop. The Collector, however, makes no remarks on this point, and estimates the outturn at 16 annas.

Balasore	Sudder	1,158	670	589	8½ annas	9 annas	The two sub-divisions of this district have differed greatly in respect of rainfall. In the Bhudruck sub-division, the season was altogether favourable, and a full average crop would be reaped were it not for the occurrence of a cyclone on November 28th. In the Sudder sub-division, on the other hand, the fall, as the Collector remarks, was singularly deficient in the period from June to September, as the following figures still show :—

During the November cyclone, 4·55 inches of rain fell in three days. This damaged the crop to the extent of 2 to 3 annas; so that in this sub-division it may be apprehended there may be tightness. Last year also the crop was a short one (9 annas).
Pooree	Sudder	1,530	720·380	506·630	14 annas ...	12 annas	The rainfall was very similar to that of Cuttack. But for this deficiency and the absence of rain in the last week of September and the first week of October, the crop would have been, the Deputy Commissioner says, a bumper one. This does not appear likely, considering the great importance of the September rains. The Deputy Commissioner estimates the outturn for the whole district at 16 annas, which, having regard to the deficient rainfall, appears to be high. Heavy rains (2 to 4 inches) were recorded at several stations in Singbhoom in November. It is not stated whether they injuriously affected the crop.

Administration Report of the Hooghly Bridge for the year ending the 31st March 1889.

Read again—

Public Works (Marine) Proceedings (A) for February 1889, Nos. 4 to 6, being the Administration Report of the Hooghly Bridge for 1887-88, together with the Resolution recorded thereon.

It was stated in the Resolution on the Administration Report of the Bridge for the last year that the Commissioners had paid off the whole of the Bridge debt due to Government. The only liability in the form of debt due from the Bridge Trust is a sum of Rs. 1,77,031, representing the portion of the capital chargeable to the Bridge in respect of the expenditure made from the proceeds of loans raised for the construction or acquisition of certain works and property designed for the joint use of the Port and Bridge Trusts. The annual charge for interest and sinking fund on this account amounts to Rs. 10,856.

2. The following table shows the actual receipts and expenditure of the Bridge during the year 1888-89, as compared with the estimated amounts, and also the actual income and expenditure of the previous nine years:—

3. The receipts from railway traffic during the last ten years are analysed in the following statement:—

4. Consequent upon the repayment of the debt due to Government, and the accumulation of the Reserve Fund, very important alterations were made in 1888-89 in the financial administration of the Bridge, resulting in a considerable reduction in the receipts. Previous to the 1st of April 1888, only two staples of traffic to Howrah, coal and wheat, had been exempted from the terminal charge. From that date rice, grain, pulses, seeds and salt were exempted, according to the recommendations made by the Committee appointed by Government in January 1888 to take into consideration the scale of fees and tolls to be adopted to cover the cost of the future maintenance of the Bridge. The Committee estimated that the terminal charges that would continue to be levied on the Bridge after the exemption of the above articles would bring in a revenue of Rs. 1,16,000. The actual figures given above show the income to have been Rs. 1,28,985; but the effect of the abolition was not felt during the first month of the year, as that month showed the payments to credit of the Bridge account of terminal charges levied on goods during March 1888, before the staples named above were exempted. Taking away the amount so collected in March from staples subsequently exempted, the income of the year from this source would be reduced to Rs. 1,14,728.

5. The receipts from local traffic included only the collections of the months from April to December, as the Bridge was declared free for local traffic from the 1st of January 1889.

6. There has been an increase of expenditure under the heads "Working expenses," "Repairs," and "Renewals." Before the Commissioners surrendered the income from local tolls, they considered it advisable to make provision for putting the Bridge in thorough repair, and for completing its equipment

by providing spare mooring material. A sum of Rs. 27,588 was spent on anchors and chains and charged to "Working expenses," and this accounts for the entire excess expenditure under this head; while against the grant for "Repairs," the drafts for cost of 118 out of 250 tons of Johore teak battens were charged off in 1888-89. The balance has since been paid for, and there are now in stock sufficient materials to completely renew the whole wearing surface of the Bridge. The expenditure on account of the maintenance and repair of the ferry steamer *Buckland* and the flat *Howrah* has been in excess of the average, the increase being due to the *Buckland* being fitted with steam steering gear, and the flat *Howrah* having undergone extensive repairs. The large expenditure under the head "Renewals" was due to the fact that the new pontoon provided for in the estimates for 1887-88 was not sent out until late in 1888, and the expenditure had therefore to be met in 1888-89.

7. It will be seen from the statement of receipts and expenditure given above that the net revenue of the year under review amounted to Rs. 60,475, making, with the net revenue of previous years, a total net revenue of Rs. 34,00,503, earned during the fourteen years the Bridge has been open for traffic.

8. The following statement shows how the entire net revenue has been appropriated:—

	To end of 1887-88. Rs.	In 1888-89. Rs.	Total. Rs.

9. In the Resolution on last year's Administration Report allusion was made to some of the recommendations of the Committee appointed to consider the revised scale of tolls and fees to be levied on the Bridge, and to the orders which had been passed on the same. As mentioned, a part of the Committee's scheme was to give out of the balance at credit of the Bridge account a sum of Rs. 2,00,000 as a contribution towards the construction by the Corporation of Calcutta of a new road from the Bridge to Sealdah. This excess balance over the requirements of the Reserve Fund, which had been fixed by Government, after consultation with the Commissioners, at 5½ lakhs of rupees, was due to the continuance of the local tolls and terminal charges after the extinction of the Bridge debt, and the accumulation of the required Reserve Fund, for which purposes those tolls and charges had been framed. The debt was paid off and the fund accumulated by June 1887, but the tolls continued to be charged till the 31st December 1888. The Government of India, however, objected to this contribution, and in consequence of the orders of that Government upon this proposal the addition to the reserve shown in the foregoing statement was made. The Corporation was still of opinion that the construction of this road was absolutely necessary for the purpose of giving greater facilities to the traffic that exists between the two places. The Lieutenant-

Governor has sanctioned the construction of this road, and the Government of India have sanctioned the raising of a loan by the Corporation not exceeding 50 lakhs, by way of debenture, on the security of the rates and taxes levied under Act II (B.C.) of 1888. The improvement which such a road would effect, and the relief it would afford to the Strand Road traffic, north and south of the Bridge, to the advantage of the traffic from the jetties and wharves, were self-evident, and on a fresh representation being made to the Government of India, that Government, though refusing to sanction legislation for the purpose of enabling the Port Commissioners to contribute the sum of Rs. 2,00,000 towards the construction of the road as proposed by the Committee, raised no objection to the Commissioners lending that sum to the Corporation of Calcutta for three years, without interest, for payment of interest on the loan to be raised for the construction of the road. An Act [Act III (B.C.) of 1889] investing the Commissioners with power to lend this amount to the Corporation of Calcutta on the terms stated has accordingly been passed. The other recommendations of the Committee on tolls and fees have been adopted and approved by Government.

10. The Bridge was kept in thorough working order during the year. The new pontoon, referred to in paragraph 6, was received from England, and put together in the Commissioners' dry dock. On completion, the defective pontoon at the west side of the sixty feet opening was drawn out, and the new one fixed in position. On examination of the defective pontoon it was found that there had been no deterioration in the material, and the only cause which could be assigned for its collapse was that the work of putting the pontoons together originally in 1873-74 was distributed over different yards, and there must have been some defective work in the erection of this particular pontoon.

11. On the 13th December 1888, the Hon'ble Sir Charles Elliot, K.C.S.I., C.S., and Colonel R Home, R.E., C.I.E., inspected the pontoons, superstructure, reserve section, and all spare material in stock. While expressing satisfaction at the condition in which everything was found, they expressed an opinion that provision should be made for further renewal of the pontoons. Although the one mentioned in the last paragraph was the first one to give out in fourteen years, the Commissioners have considered it advisable to appropriate annually a portion of whatever surplus revenue the accounts may show towards the purchase of new pontoons.

12. The Bridge was open for the passage of vessels on 122 occasions, including 20 special Sunday openings. The number of vessels which passed through the opening is given in the following statement:—

	1888-89.	1887-88.	1886-87.	1885-86	1884-85.	1883-84.	1882-83.	1881-82
Sea-going vessels	380	331	295	366	403	469	442	413
Inland steamers and flats	878	899	848	1,102	944	738	664	629
Steam tugs	456	397	387	406	342	361	409	359
Port Commissioners' vessels	20	46	56	69	56	58	42	48
Government steamers and flats	7	6	10	6	10		...	

13. No sea-going vessels collided with the Bridge in passing through the opening, but there were 91 collisions of other vessels, as compared with 63 during the previous year. One of the most disastrous was that of the Port Commissioners' steamer *Research* which collided with the Bridge on the 25th August 1888, resulting in the loss of two lives and the total loss of the vessel. Fifteen country and cargo-boats sank after collision, and on one of these occasions there was a loss of one life. Three steam launches also collided with the Bridge, two of which sank. The increase in the total number of collisions as compared with that of the preceding year was due to the unusually heavy freshets of the year. On one occasion (August 31st) it was found impossible to open at all on the advertised day, owing to the unusual strength of the tide, the Superintendent reporting that the attempt to open on that occasion was more than running a risk, it meant almost certainty of serious damage.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Bridge Commissioners for information.

Ordered also that this Resolution be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

C. W. I. HARRISON,

Offg. Joint-Secretary to the Government of Bengal.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground

The barometer readings are corrected approximately to those of the standard, Newman's No 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

* Means of six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100 A clear sky is denoted by 0 and an overcast sky by 10. The number are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 27th of December 1889.

CALCUTTA, *the* 31*st December* 1889.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 27TH DECEMBER 1889.

At the close of the previous week weather conditions in Bengal were quite normal for the season, and therefore of ordinary cold weather character. In the Bay also weather was fine except in the extreme south, where along the Madras coast from Cuddalore southwards rain was falling, the conditions being still disturbed as the result of the cyclonic storm which had passed across the extreme south of the peninsula on December 18th, moving in a westerly direction. On the 21st, or the first day of the present week, conditions in Bengal remained unaltered, but skies clouded up heavily over the south of Burma. Drizzling rain commenced over this area, and pressure fell slightly at Diamond Island, while elsewhere it was generally rising. Winds also at the South Burma stations commenced to show distinct indraught towards the south of the Bay, and at Diamond Island, instead of the light winds usual at this season, wind had increased to almost a gale. On this day, therefore, it is clear that weather had became very disturbed over the south of the Bay, and it is probable that a cyclonic storm had commenced to form. On the 22nd the area of stormy weather was still quite in the south of the Bay and probably about Longitude 88° E. The storm, therefore, appeared on this day to have drifted in a westerly direction, and probably the centre of the storm was not further north than Negapatam, or perhaps even than Trincomalee. At this time all the indications appeared to point to the probability that the storm would advance across the extreme south of the peninsula, or even across the north of Ceylon. On the morning of the 23rd, the storm was probably to the east-north-east of Negapatam and at some distance from land, and it was moving slowly in a north-westerly direction. On the 24th it had again advanced in a north-westerly direction, and its centre was probably to the east of Nellore or east-north-east of Madras; while on the morning of the 25th it had come much nearer the land, and its centre was to the south-east of Masulipatam. Even on the morning of the 25th it was apparent that the storm had ceased to intensify, but it was on this date a rather severe storm; but by the morning of the 26th, and particularly from midnight of the 25th, the storm had commenced to fill up rather rapidly. On this date it had become only a barometric depression, but it was accompanied by fairly strong winds, and the position of its centre was decidedly nearer the land than on the previous day, and it was perhaps even a little to the south-west of its previous position. On the morning of the 27th the depression had quite passed inland, the centre crossing the coast apparently between Masulipatam and Nellore during the afternoon or evening of the 26th. The storm in its progress was accompanied by only a moderate barometric depression as indicated by the readings at the coast stations, but it will be observed that the storm centre was at no time very near to any meteorological station while it existed as a severe storm. The strength of the winds in the northern half of the storm was decidedly great, and for two days a gale of wind was blowing at some of the ports on the west coast. No observations from ships which were involved in the storm have yet been received, but it is probable that very severe weather accompanied the northern half of the storm, but winds in the southern half appear to have been comparatively feeble. The rainfall in connection with the storm at the land stations has been also only moderate.

As is usually the case, directly a rather severe storm is formed in the Bay, weather conditions commenced to change in Bengal. Temperature at first began to rise slowly, but from about the 23rd or 24th, when the skies had clouded over quickly, the night temperatures rose very rapidly and became very high. The storm in its north-westerly advance apparently also caused a wave of moist winds from the sea to advance over Bengal, and on about the 24th at many stations the sky was almost overcast, while humidity as well as temperature was high. In Orissa and South-East Bengal, and in parts of South and even North Bengal, so much moisture was thus brought up that light showers commenced to fall at a few stations, and dull and rather gloomy weather obtained for some days,—in fact almost up till the close of the week. For a considerable part of the week under review, therefore, the weather conditions have been almost the reverse of the normal north-east monsoon weather, but with the gradual breaking up of the storm on the 26th, and with its disappearance inland on the 27th, conditions had begun slowly to improve again in Bengal even on the 26th and 27th of the month.

Pressure.—The storm which has been previously described was, even in its nearest advance, so far from Bengal that it had not much practical effect on the pressures recorded, except that at many stations, and particularly at those in the south-west of the province, pressure continued to fall very slowly up to about the 25th; but on the last two days of the week there was a rise, the increase on the 27th being rather rapid. The mean pressure for the week has been almost normal in Behar and North Bengal, but over the southern, and particularly over the south-western, districts there has been a distinct defect. In South Bengal generally the defect has varied from about two to four hundredths of an inch, but at such stations as Gopalpur and False Point, which were nearest to the storm, the defect has equalled about seven hundredths of an inch.

Temperature.—A very large increase in the night temperatures took place during the week, as before recorded, and generally temperature has been rather largely in excess of the normal throughout the week. The excess in the mean temperature has been largest in South-West and East Bengal and South Behar, where it has averaged from five to six degrees. In

Orissa, Chutia Nagpur, and North Bengal, the excess has been from four to five degrees, while the smallest excess of all is nearly four degrees in North Behar. The average mean temperature for the whole province has therefore been almost five degrees in excess of the normal for the week.

This excess has been most largely marked in the minimum or night temperatures. This will be seen clearly in the following table, where the average maximum, mininum and mean temperatures for the week for nine typical stations in different districts of the province are compared with their normal values for the same period. The usual range of temperature during the week in various districts can therefore also be here clearly seen. At such stations as Calcutta, Cuttack, and Burdwan, the average night or minimum temperatures for the week have been no less than about eight degrees in excess of the normal, while at the same stations the day or maximum temperatures have only been about three degrees in excess: —

Rainfall.—Though a few showers have been received in Orissa and South-East Bengal, and at a few stations in South and North Bengal, the amounts received have not been important The stations in Orissa and East Bengal show an average rainfall of a little more than a tenth of an inch, but the amounts in the other districts have been so small that they have only averaged a hundredth of an inch False Point received the heaviest fall of about an inch, while the following stations received falls of a fifth of an inch and upwards:— Pooree, Kendrapara, Bagirhat, Nokipur, Chittagong, Rangamati, Perozepore, Burrisal, Bhola, Bauphal, and Feuny.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 27th of December 1889:—

	Tons.
INCREASE.	
Grains—	
(4) Others	41
This increase is owing to greater import of paddy for high price at Azimganj.	
DECREASE.	
Coal	104
This decrease is due to previous stock not being exhausted.	
Cotton piece-goods—	
(1) European	45
This is due to this traffic being carried by steamers plying between Jeagunj and Calcutta.	
Grains—	
(2) Rice	801
This is due to less export from intermediate stations.	
Jute—	
(2) Gunny-bags and cloths	18
This is due to less export of grains.	
Oilseeds—	
(6) Others	45
This is due to less import for dull market.	
Provisions—	
(2) Dried fruits and nuts	15
Owing to less import of cocoanuts.	
Railway plant and rolling-stock	31
This is due to less materials carried during the month.	
Salt	27
This is due to this traffic being carried by boat.	
Sugar—	
(1) Drained	11
Less imported on account of less demand.

Secretary to the Govt. of Bengal.

NOTIFICATION.

The 1st January, 1890.—The following revised rules for the award of Junior and Senior Scholarships are published for general information :—

JUNIOR SCHOLARSHIP RULES.

ONE HUNDRED AND FIFTY-TWO* Government junior scholarships shall be awarded annually at the University Entrance Examination to successful candidates educated at schools in Bengal.

2. The scholarships shall be of three grades—10 of the first grade, carrying monthly stipends of Rs. 20; 47 of the second grade, carrying monthly stipends of Rs. 15; and 95 of the third grade, carrying monthly stipends of Rs. 10.

3. With the sanction of the Director of Public Instruction, a junior scholarship may be held at any one of the affiliated colleges in Bengal which the holder may select. A Government junior scholarship may also be held in the United Kingdom, subject to the conditions of good conduct and satisfactory progress, but not in other provinces of India

4. Each scholarship shall, subject to good conduct, be tenable for two years, provided the holder is certified by the Principal of his College, at the end of the first year, to have made due progress in a collegiate course of instruction.

5. The holder of a junior scholarship in an institution not under the management of Government shall be liable at any time to be examined by two persons appointed by the Director of Public Instruction and approved by the Principal of the College to which he belongs, and, on proof of unsatisfactory progress, to be deprived of his scholarship.

6. No candidate shall be eligible for a scholarship who has not studied for the whole session previous to the examination in the school to which he belongs at the time of presenting himself at the Entrance Examination, unless he has been transferred within that period with the sanction of the Circle Inspector.

7. The scholarships of the first grade shall be awarded to the ten candidates who obtain the highest aggregate marks.

8. The scholarships of the second and third grades shall, subject to future reconsideration, be allotted to the several Commissionerships in the following proportion :—

		Second grade.	Third grade.
Burdwan Division	... ...	6	12
Town of Calcutta	... ...	6	11
Presidency Division	... ...	6	12
Rajshahye ditto	... ...	6*	10*
Dacca ditto	... ...	6	12
Chittagong ditto	... ...	2	6
Patna ditto	... ...	6	12
Bhagulpore ditto	... ...	3	9
Orissa ditto	... ...	4	6
Chota Nagpore ditto	... ...	2	5
	Total ...	47	95

* This includes the two special scholarships—one of the second grade and the other of the third—established in 1879 for the benefit of the Rungpore Zillah School.

9. The Commissioner of the Division, in consultation with the Circle Inspector, will notify in the *Calcutta Gazette*, not later than the 1st September of each year, the number of junior scholarships to be allotted to each district at the ensuing examination. This distribution should be confined to third grade scholarships, those of the second grade being awarded to the best students in the division without reference to districts. Scholarships not taken up in the district or division to which they are assigned may be awarded by the Director of Public Instruction, at his discretion, to deserving candidates from other divisions, special regard being had to the requirements of those parts of the country in which it is considered desirable to stimulate the demand for collegiate education

10. No candidate who is unable to read and write with facility and correctness one of the vernacular languages of Bengal shall be eligible for a junior scholarship.

11. No candidate shall be eligible for a scholarship who does not take up for the Entrance Examination as a second language one of the languages recognized by the University for the First Arts Examination.

12. The holders of scholarships in all Government colleges shall be required to pay the usual monthly fees levied from other students, provided that no scholarship-holder shall be required to pay a higher fee than Rs. 10 a month.

SPECIAL JUNIOR SCHOLARSHIPS FOR MUHAMMADANS.

Twenty scholarships of Rs. 7 a month each, tenable for two years at any college affiliated to the Calcutta University, shall be awarded to Muhammadan students of the Lower Provinces passing the Entrance Examination and failing to obtain any more valuable exhibition.

SPECIAL JUNIOR SCHOLARSHIPS FOR FEMALES.

Three junior scholarships, one of each grade, shall be open annually for competition at the Entrance Examination to female candidates educated in any school in Bengal. They shall be tenable in any collegiate institution approved by the Director of Public Instruction, and shall be awarded on conditions similar to those prescribed for general scholarships.

SENIOR SCHOLARSHIP RULES.

Fifty Government senior scholarships shall be offered annually for competition at the First Examination in Arts to successful candidates educated in any college in Bengal affiliated to the University of Calcutta.

2. These scholarships shall be of two grades—10 of the first grade, carrying monthly stipends of Rs. 25, and 40 of the second grade, carrying monthly stipends of Rs. 20.

3. With the sanction of the Director of Public Instruction, a senior scholarship may be held at any affiliated college in Bengal which may be selected by the holder. A Government senior scholarship may also be held in the United Kingdom, subject to the conditions of good conduct and satisfactory progress, but not in other provinces of India.

4. Each scholarship shall, conditionally on good conduct, be tenable for two years, provided that, at the end of the first year, the holder is certified by the Principal of his College to have made due progress in a collegiate course of instruction.

5. Second-year students alone, *i.e.*, students who present themselves for the First Examination in Arts not more than two years after passing the Entrance Examination, shall be eligible for scholarships.

6. The scholarships of the first grade shall be awarded to the ten candidates who obtain the highest aggregate marks.

7. The forty scholarships of the second grade shall, subject to future reconsideration, be reserved for students at affiliated institutions in different parts of Bengal in the following proportions:—

	Number of scholarships.
Town of Calcutta	10
Presidency Division, outside Calcutta	4
Burdwan Division	8
Rajshahye ditto.	3
Dacca and Chittagong Divisions	7
Patna and Bhagulpore ditto	6
Orissa Division	2
Total ...	40

The scholarships shall be awarded to the candidates from each tract who obtain the highest marks at the examination, and who do not gain scholarships of the first grade, provided that their names appear in the first or second division of the list of passed candidates. Scholarships may, however, be awarded in special cases to candidates from Behar or Orissa who fall below the second division. Scholarships not taken up in the tracts to which they are assigned may be awarded by the Director of Public Instruction, at his discretion, to deserving candidates from other tracts, special regard being had to the requirements of those parts of the country in which it is considered desirable to stimulate the demand for collegiate education.

8. No candidate shall be eligible for a scholarship who has not studied for the whole session previous to the examination in the institution to which he belongs at the time of presenting himself at the First Arts Examination, unless he has been transferred within that period with the sanction of the Director of Public Instruction.

9. The holders of senior scholarships in all Government colleges shall be required to pay the usual monthly fees levied from other students.

SPECIAL SENIOR SCHOLARSHIPS FOR MUHAMMADANS.

Twenty scholarships, tenable for two years—ten of Rs. 10 a month each, and ten of Rs. 7 a month each—shall be awarded on the result of the First Arts Examination to Muhammadans who fail to obtain any more valuable exhibition.

SPECIAL SENIOR SCHOLARSHIPS FOR FEMALES.

Two senior scholarships, one of each grade, shall be open annually for competition at the First Examination in Arts to female candidates educated at any college in Bengal. These scholarships shall be awarded on conditions similar to those laid down for the general senior scholarships, and shall be tenable in any collegiate institution approved by the Director of Public Instruction.

Additional soundings north-eastward of St. Lazarus Bank.

WITH reference to Notice to Mariners, No. 67, dated 2nd July last, issued by this office, the British Admiralty has given notice (No. 403 of 1889) that some further soundings have been obtained by H. M. Surveying Ship *Stork* to the north-eastward of the bank as defined in that Notice, which indicate the existence of either another bank, or of an extension of the slope of the St. Lazarus bank for some 30 miles. No sounding less than 320 fathoms was obtained, but until the ground is more thoroughly searched, vessels should avoid passing over this area to the north-eastward of the St. Lazarus bank.

The soundings obtained are as follows:—

(1) Lat. 11° 55′ S., long. 41° 28′ E. ... ... 320 fathoms
(or 9 miles northward of a depth of 1,080 fathoms previously obtained).
(2) Lat. 11° 48½′ S., long. 41° 35⅜′ E. ... ... 460 fathoms.

AUSTRALIA—EAST COAST.

INNER ROUTE.

Shoal north-eastward of two isles.

THE British Admiralty has given notice (No. 405 of 1889) of the existence of a coral shoal lying about 1½ miles north-eastward of two isles :—

This shoal, with a depth of 6 fathoms, is 8 cables in length within the 10-fathoms line in a north-east and south-west direction ; from the shoalest part, South Direction island bears N. 18° E., distant 11 miles, and cape Flattery summit N. 76° W., distant $7\frac{7}{10}$ miles.

Position, lat. 15° 0′ S., long. 145° 30′ E.

Also the following information concerning g reef and Sand Bank, lying respectively about 5½ and 7 miles eastward of Two isles :—

g reef, as heretofore charted, does not exist.

Sand bank, now named g reef, is 4 cables in length in an east and west direction, with a width of 2½ cables, it is steep-to, and has a small sandy head near its west extreme which dries 6 feet at low water spring tides ; from this head, cape Flattery summit bears N. 83° W., distant $13\frac{5}{10}$ miles, and South Direction island N. 18½° W., distant $10\frac{8}{10}$ miles.

Position, lat. 15° 0½′ S., long 145° 36′ E.

Unsuccessful search for shoal north-west of Look-out point.

FURTHER information has been received that a shoal spit extends in a north-westerly direction from Look-out Point for a distance of 2¼ miles, having a least depth of 6 feet, with the summit of the point bearing S. 45° E., distant 2 miles ; it is steep-to on its eastern edge, the water deepening quickly from 2 to 6 and 7 fathoms ; on the north-western side it deepens more gradually.

The position heretofore given for the 2¼ fathoms shoal is about 8 cables northward of the extreme of the spit, and depths of 6½ to 7½ fathoms, over even ground were obtained around that spot with no sign of shoal water.

Consequent on the foregoing, it is considered that the *Decapolis* grounded on the spit about 2 miles north-west of Look-out point, and the 2¼ fathoms shoal has been removed from the Admiralty Charts.

NOTE.—Cape Flattery summit in line with the red beacon on Sand cay (about 2½ miles south-east of Look-out point), bearing S. 38° E., leads eastward of the shoal ground off Look-out point ; and end of range in line with Round hill, bearing S. 82° W., leads 4 cables northward of it.

E. W. PETLEY,
Port Officer of Calcutta.

SIMONOSEKI STRAIT—WESTERN ENTRANCE.

Fixed light on Narusi rock.

THE British Admiralty has given notice (No. 415 of 1889) that on 21st September 1889 a light would be exhibited from the beacon (which has been rebuilt during the present year) on Narusi rock, north side of western entrance to Simonoseki strait :—

The light is a *fixed* white light, visible from the bearing of S. 86°E., through north, to S. 48° W. ; it is elevated 17 feet above high water, and should be seen in clear weather from a distance of three miles.

The beacon, constructed of stone and circular in shape, is painted white.

Position, lat. 33° 54′ 45″ N, long. 130° 54′ 50″ E.

NOTE—The light is kept burning day and night by automatic arrangement without the constant attendance of a keeper. Should the light be extinguished by accident, there may be some delay in re-lighting it.

Prize Essay for Native Ladies.

THE following subject has been selected for Babu Brajamohan Dutt's Prize of Rs. 40 for the year 1889-90:—

"The present condition of Bengali Women."

The conditions for the award of the prize are—

(1) That the competition be open to all educated women, being natives of Bengal, without regard to age.

(2) That the prize be given for an essay, to be written in either Bengali or Sanskrit.

(3) That the essays be sent to the Central Text-Book Committee for adjudication within six months of the date of advertisement.

(4) That each essay be accompanied by the written declaration of the husband parent, or guardian of the competitor that, to the best of his belief, she has received no assistance of any kind, direct or indirect, in writing the essay.

Candidates are requested to send their essays not later than the 30th June 1890, to the Secretary to the Central Text-Book Committee, Office of the Inspector of Schools, Presidency Circle, Calcutta. The envelope containing the essay should be superscribed "Brajamohan Dutt Prize Essay." The name of the successful competitor will be published in the *Calcutta Gazette*.

The winner of the prize in any year may, if she pleases, again compete. If she is adjudged to have sent in the best essay in such subsequent competition, her name will be published in the *Gazette*, but the prize will be awarded to the next eligible candidate.

No prize will be awarded if, in the opinion of the judges, the best essay sent in is not such as to deserve a prize.

Monghyr Collectorate, the 4th December 1889. T. E. COXHEAD, Officiating Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the Conditions of Sale below, to the undermentioned estate situate in the district of Maldah, will be put up to sale at the Maldah Collectorate on 11th January 1890, corresponding with 28th Pous 1296 B.S.

The purchasers will be subject to the following conditions of sale—

Conditions of sale.

1*st.*—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2*nd.*—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3*rd.* If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

4*th.*— If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Shahabad Collectorate, Arrah, the 22nd December 1889

E. F. GROWSE, Offg. Collector.

NOTICE is hereby given that on the undermentioned plots of the Nizamut lakhraj State lands situated in the district of Burdwan, Nos. 72 to 75 will be put up to sale on the spot by the Deputy Collector at the Burdwan Collectorate, and No. 89 by the Sub-divisional Officer of Culna, on Monday, the 27th January 1890, corresponding to 15th Magh 1296 B. S.

The purchasers will be subject to the following conditions of sale:—

Conditions of Sale.

1. The lands to be sold revenue-free to the highest bidder above the upset price, which will be fixed for each plot at the time of sale.

2. The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and the purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3. If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4. If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the lands to be again put up to sale at the risk of the defaulting purchasers, after issue of advertisement, as in the case of original sale.

5. The purchasers shall be put in possession on receipt of the orders of the Collector approving of the sales, but such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

Road-cess Notification.

DISTRICT BACKERGUNGE.

IT is hereby notified for general information that under section 46 of Act III (B.C.) of 1885, the District Board of Backergunge have, at a Special Meeting, held on the 21st December 1889, determined that the road-cess for the next cess year 1890-91, shall be levied at half of the maximum rate, *i.e.*, one pice a rupee on the annual value of land.

ROJONI KANTA DASS, Vice-Chairman.

Dinagepore District Board.

SIX PER CENT. LOAN.

THE Dinagepore District Board have resolved, with the permission of the Lieutenant-Governor of Bengal, to borrow Rs. 10,000 (out of two lakhs of rupees) during the current financial year (1889-90) for construction of permanent bridges in their district roads on security of the District Fund formed under Act III (B.C.) of 1885, detailed accounts of which for last two years were published in the *Calcutta Gazette*, Part IB, page 164, dated 7th August 1889.

2. Tenders for the whole or any part of the said amount of Rs. 10,000 will be received by the Vice-Chairman of the Board from this date to Friday, the 31st January 1890. Tenders must be in sums of Rs. 500) or multiples of Rs 500.

3. Each tender must be addressed in the form annexed herewith to the Vice-Chairman, and enclosed in a closed and sealed cover superscribed "Tender for Loan." If the tenderer is not resident in India, he must name an agent resident in India, to whom a letter of allotment may be issued if any part of the loan is allotted to such tenderer.

4. Each tender must be accompanied by deposit money, at a rate of 5 per cent on the amount tendered, to be sent by postal money-order, and the money-order receipt must be filed with the tender. Deposits will, in the case of accepted tenders, be credited proportionally in part payment of the allotment certificates issued in respect of the tender. If any allotment certificate is not fully taken up, the deposit will be forfeited.

5. The rate at which a tender is made must not contain a fraction of an anna : if a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out, and the tender treated as if the rate did not contain such fraction of an anna.

6. The rate at which each tender is made must be specified in rupees, or rupees and annas. A tender in which no rate is thus specified, but a subscription is offered in some other terms, *e.g.*, at the recorded minimum, or at some specified percentage in addition to the recorded minimum, or at the average of the accepted tenders, will be rejected as null and void.

7 Tenders will be opened publicly by the Vice-Chairman at the Dinagepore Magistracy on Saturday, the 1st February next, at noon (Calcutta time).

8. Tenders at the minimum rate will be accepted in the order of the rates tendered, beginning with the highest rate. The amount allotted at the lowest rate at which tenders are accepted will be divided amongst those who have tendered at this rate in proportion, as nearly as may be found convenient, to the amounts of their tenders, provided that no allotment will be issued if the amount distributable on any tender is less than Rs. 500.

9. To each tenderer (or to his agent) whose tender is accepted in whole or in part, such number of allotment certificates as may be necessary to make up the aggregate amount allotted to him will be issued by the Vice-Chairman as soon as possible after the tenders have been accepted, and a list of the names of those to whom such allotment certificates are issued will be posted for general information at the District Board's Office.

10. Payment of any allotment certificate is to be made in credit of the District Fund at the Dinagepore Treasury.

Form of Tender

I, A B., hereby tender for Rs. (Rs. ,) of the six per cent. loan advertised in the *Calcutta Gazette*, dated , and agree to pay for the same subject to the condition mentioned in the advertisement, at the rate of Rs. As. for every hundred rupees allotted to me.

I enclose a money-order receipt for deposit money for Rs sent to the address of the Vice-Chairman of the Dinagepore District Board.

Any allotment made to me may be communicated to at

NOTE.—A separate tender must be made at each rate tendered The rate tendered should be the whole amount per centum, not the premium or discount: thus "one hundred and two" or "one hundred." or "ninety-nine," not "two per cent. premium" or "par" or "one per cent. discount."

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

3. In section one of the same Act, for the words "the Town, Port, and Suburbs" the words "Calcutta and the Port" shall be substituted.

Amendment of definition of "Town of Calcutta."

4. (*1*) In section two of the same Act, for the definition of "Town of Calcutta" the definition "'Calcutta' means Calcutta as defined by the Calcutta Municipal Consolidation Act, 1888" shall be substituted.

Addition to definition of "Port of Calcutta."

(*2*) In the same section, add the following to the definition of 'Port of Calcutta':—

"or of any other law for the time being in force."

Repeal of definition of "Suburbs of Calcutta."

(*3*) In the same section, the definition of "Suburbs of Calcutta" is hereby repealed.

"Calcutta" substituted for "Town of Calcutta" in Act V, 1880.

5. In the Bengal Vaccination Act, 1880, for the words "the Town of Calcutta," wherever they occur, the word "Calcutta" shall be substituted.

Amendment of section 16, Act V, 1880.

6. In section sixteen of the same Act, for the words "the said Town" the word "Calcutta" shall be substituted.

Amendment of section 19, Act V, 1880.

7. In section nineteen of the same Act, for the words "in the said Town" the word "therein" shall be substituted.

Amendment of section 5, Act II, 1887.

8. In section five of Act II, 1887, the words "the Town or Suburbs of" are hereby repealed.

Amendment of section 6, Act II, 1887.

9. In section six of the same Act, for the words "the Town, or Port of Calcutta, or the Suburbs" the words "Calcutta or the Port" shall be substituted.

Rules and orders in force before passing of Act to be in force in Calcutta as defined by Act II, 1888.

10. (*1*) All rules made and orders issued under section thirty-three of the Bengal Vaccination Act, 1880, relating to the Town of Calcutta in force immediately before the passing of this Act, shall be deemed to be in force in Calcutta as defined by the Calcutta Municipal Consolidation Act, 1888.

(*2*). The Local Government may, from time to time, modify or cancel such rules and orders.

(*3*). And all such rules and orders relating to the Suburbs of Calcutta are hereby repealed.

STATEMENT OF OBJECTS AND REASONS.

The Lieutenant-Governor was empowered under section thirty-three of the Bengal Vaccination Act, 1880, to make rules and issue orders in all matters connected with the working of that Act which was applicable in the first instance to the Town of Calcutta, the Port of Calcutta, and the Suburbs. Separate rules were made for Calcutta, for the Suburbs, and for places outside Calcutta and the Suburbs; and as it is desirable to have the same rules in force henceforth in the Old Town of Calcutta, and in that portion of the Suburbs which has been amalgamated therewith by Act II, 1888, and to place the parts of the Suburbs not so amalgamated under the same rules as those made for the places outside the Old Town of Calcutta and the Old Suburbs, the present Bill is introduced to give effect to these objects.

RULES FOR THE CONDUCT OF BUSINESS.

THE Hon'ble Sir Charles Paul presented the Report of the Select Committee appointed to consider and amend the Rules for the Conduct of Business at Meetings of the Council.

He said:—"The Council will see from the report the amendments which have been made. The rules have been redrafted in what we considered a more convenient form. The only material alterations are those mentioned in the report, to two of which I shall refer. One of these is Rule 31, where it is provided that when a Bill is introduced, it shall, together with the Statement of Objects and Reasons, be published in the English and Vernacular languages in the official gazettes of such parts of Bengal as are affected by the Bill And on some subsequent occasion the member in charge of it shall make one or more of the following motions:—(*a*) that it be referred to a Select Committee, or (*b*) that it be taken into consideration by the Council at some future day, or (*c*) that it be circulated for the purpose of eliciting opinions thereon.

"The amendment which we have made is this. We have provided in certain cases, whenever it may be unnecessary to refer a Bill to a Select Committee, that it may be taken into consideration by the Council Occasions have arisen where a reference to a Select Committee was useless to provide for such cases. We have put in clause (*b*) of Rule 31.

"But inasmuch as it may be said that such a Bill should not be passed too summarily, we have provided that it shall be published with the Statement of Objects and Reasons, and as a rider upon that we have, as mentioned in the fifth paragraph of our report, provided, as a matter of further precaution, that the President shall have authority, upon a motion to consider a Bill being carried, to submit the Bill itself, or any part of it, section by section, to the Council; thus making the Council act the part of a Select Committee.

"Then another rule to which I wish to call attention is Rule 44. This is intended to meet the case which has occurred more than once of the passing of a Bill being postponed on account of some formal or trifling amendment having been made.

"I wish to point out another matter which came before the Select Committee. Under the Indian Council's Act the President has a casting vote. That provision was made a rule under our existing rules. The Members of the Select Committee thought that it did not come within the scope of a rule, and therefore what we propose to do (but which has been left out by mistake) is to add a foot-note indicating that the President has a casting vote under a particular section of the Indian Council's Act. This has only been done for the purpose of making the subject complete and calling attention to it.

"We have also provided that the right of the President to address the Council before putting the question should be indicated in specific terms, and have introduced a rule giving effect to that object. These are the principal amendments we have made."

His Honour the President said:—"This Report will be in the hands of Members to-day, and the Rules will be brought forward for passing at the next meeting of the Council. Under the rules we have yet to get the consent of the Government of India before they can come into force."

BENGAL VACCINATION BILL.

The Hon'ble Sir Henry Harrison introduced the Bill to amend the Bengal Vaccination Act, 1880, and Act II, 1887, and moved that it be read in Council.

He said:—"I explained at the last meeting the objects and measures of this Bill which are very much of a formal character"

The Motion was put and agreed to.

The Bill was read accordingly.

The Hon'ble Sir Henry Harrison also moved that the Bill be referred to a Select Committee, consisting of the Hon'ble Messrs. Nolan and Allen, and the Mover, with instructions to report thereon within one fortnight.

The Motion was put and agreed to.

CALCUTTA AND THE SUBURBAN POLICE SUPERANNUATION FUNDS BILL.

The Hon'ble Sir Henry Harrison moved that the Report of the Select Committee on the Bill to consolidate the Calcutta and the Suburban Police

Superannuation Funds be taken into consideration in order to the settlement of the clauses of the Bill.

The Motion was put and agreed to.

The Hon'ble SIR HENRY HARRISON also moved that the clauses of the Bill be considered for settlement in the form recommended by the Select Committee.

He said:—"I wish to make one remark on the present occasion. The Select Committee in their report said, that they struck out so much of section 2 as made the provisions of that section applicable to the Clerk appointed to manage the Superannuation Fund.

"Since then I have received a memorial from the Clerk drawing attention to the hardship to him of losing his pension, but so long a time has elapsed since the report of the Select Committee was prepared that I have not been able to remember why we left it out I do not think we had the intention of depriving the Clerk of his salary or pension

"My recollection is, that we considered the wording of section 2 sufficient without making any particular reference to the Clerk. The words of the section are:—'The Police Superannuation Funds * * * * shall be consolidated, and shall form one Police Superannuation Fund and, shall be applied from time to time to the payment of the charges incurred in the control and management of the said Fund.' That is the first purpose to which the revenues of the Fund are to be applied. The section goes on to say—'and of such superannuation or retiring allowances or gratuities as may be ordered by the Local Government at any time to any Police Officer of the Calcutta or Suburban Police Force,' and the words followed—'or to any person employed as a Clerk to manage the said Fund.' That seemed to the Select Committee rather confused, because the first purpose to which the revenues are to be applied, viz., the management of the Fund, is quite different from the second purpose, which is the payment of pensions and gratuities to members of Police Force for which the Fund primarily exist. Therefore to put the Clerk in the same category as the Police Force seemed rather out of place The Clerk rather came under that portion of the section which made the revenues applicable to the payment of the charges incurred in the control and management of the Fund.

"But as there may be some doubt, I will ask the Council to insert such words as will remove all difficulty, and therefore I move that the words 'including salaries, pensions or gratuities' be inserted after 'charges' in line 7 of section 2, making the wording run thus: 'and shall be applied from time to time to the payment of the charges, including salaries, pensions or gratuities, incurred in the control and management of the said Fund.' That, I believe, will make the intention quite clear."

The Motion was put and agreed to.

The Hon'ble Sir Henry Harrison's motion that in line 7 of section 2, after the word "charges" the words "including salaries, pensions or gratuities" be inserted, was also put and agreed to.

CALCUTTA PORT BILL.

HIS HONOUR the President said:—"The next item of business on the list is to consider the Report of the Select Committee on the Bill to consolidate and amend the law relating to the Port of Calcutta and to the appointment of Commissioners for the said Port. On that subject the Hon'ble Mr. Moore has rather an important amendment to propose; and as the matter is still under the consideration of the Chamber of Commerce, he asks that the consideration of this Bill be postponed. I am sure the Council will readily accede to the Hon'ble Member's request, and I hope we shall be able to discuss the Bill at our next meeting."

The consideration of the Report was postponed.

The Council adjourned to Saturday, the 11th January, 1890.

* Means of five days. | † Means of six days.

Explanation —Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the la

The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numb

are the arithmetical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station for the period in question during the pa

stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 3rd of January 1890.

CALCUTTA, *the 7th January* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 3RD JANUARY 1890.

THE meteorology of the week ending the 27th of December 1889 had been important from the formation of a cyclonic storm in the south of the Bay which had advanced in a north-westerly direction, crossing the Madras coast between Masulipatam and Nellore on the afternoon or evening of December 26th. An advance of humid winds had passed over Bengal in connection with the storm, and heavily-clouded skies and in a few cases light rain showers had occurred over the southern districts of the province. With the gradual disappearance of the storm, and on its passing inland on the 26th, the weather in Bengal began to improve, and on the 26th and 27th conditions were decidedly less disturbed than they had been, while the skies had even commenced to clear.

The gradual return to the normal conditions for the cold weather season which had therefore commenced at the close of last week, continued at the beginning of the present week, and by the middle of the week conditions had become nearly normal. In the earlier part of the week, therefore, temperature, and particularly the night temperatures, fell rather rapidly, humidity also decreased, and the sky cleared rather quickly, while rainfall became entirely absent.

Pressure—Rose very slowly on the first day of the week, it then fell moderately for the next three or four days, commencing to rise again rather briskly on the 2nd January, which rise continued on the 3rd. The mean pressure of the province for the week has, however, been very considerably in defect of the normal, the defect usually ranging from five to about eight hundredths of an inch. This defect has been fairly equally distributed over the whole province.

Temperature—Has fallen generally during the week, but still the average mean temperature of the province has been nearly 2° above the normal. This excess has been largest in South-West and East Bengal and in South Behar, where the excess has equalled between two and three degrees.

The general temperature recorded during the week in the different districts of the province can be seen from the following table, where the average maximum, minimum and mean temperatures at nine typical stations are compared with their normal values for the same period. It will be seen that exceptionally high day temperatures have been recorded at Darjeeling, where the actual is almost 10° higher than the normal. The night temperatures at the same station exceed the normal by three degrees. Generally speaking, however, the excess temperatures are fairly equally divided over both day and night:—

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·3° lower; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

MEMORANDUM.

THE chief features in connection with the vital statistics of the principal Municipalities in Bengal for the week ending 21st December 1889, are the following:—

1. That births and deaths were registered in these Municipalities at the rates, respectively, of 25·2 and 30·2 per 1,000 of population, as opposed to 26·9 and 31 6 per 1,000 in the preceding week ending 14th December, indicating a retrogression in the registration of both the events

2. That these events were returned in the highest proportions from the following Municipalities:—

Births.

	Ratio per *mille.*
Arrah	50·2
Naraingan j	41·4
Serampore	39·3
Hughli and Chinsurah	37·7
Rampore Beauleah	36·8
Ranaghat	35·9
Comillah	34·7
Bhagulpore	34·4
Durbhanga	33·0

Bhagulpore	34·4
Rampore Beauleah ...	34·2
Monghyr	33·4
Gya	32·1
Chittagong	30·5

3. That the mortality from the principal death-causes stood as follows, in comparison with that of the preceding week:—

	Ratio per *mille* during the weeks ending—	
	21st December 1889.	14th December 1889.
Cholera	2·4	4·7
Small-pox	·2	·2
Fever	12·8	13·4
Bowel-complaints	5·2	5·0
Injury	·5	·4
Other causes	9·1	7·9

indicating chiefly that there was a noticeable decrease in the death-rate from cholera with an increase in that from the maladies classed under the head of "Other causes."

4. That while only one town (Poori, mortality 10·5 per 1,000 of population) exhibited fatal results from small-pox, and that to a noticeable extent, and injury shewed no conspicuous fatality anywhere, the under-mentioned Municipalities returned the highest death-rates from cholera, fever, bowel-complaints, and "Other causes":—

1889. April, 15th	Pages. 45	12mo dy	1st ...	500	Printed	Rs. A. P. 1 0 0	Akshaya Kumár Kábyabinod, 148, Baranasi Ghosh's Street, Calcutta.	In the preface the writer finds fault with the language, manner and matter of the most popular school-books in Bengali, with the Inspectors of Schools for allowing these books to be still used, and with the Central Text-book Committee, the members of which, he says, are masses of matter with a small quantity of life infused into them. There are pieces in prose also. The writer gives copious notes at the foot of each page in which he speaks very hard of modern Sanskrit scholarship.	8766

YEZO—SOUTH WEST COAST.

Non-existence of Waywoda rock.

THE British Admiralty has given notice (No. 422 of 1889) of the non-existence of Waywoda (Voevoda) rock in the sea of Japan.

This rock was originally reported by the Russian corvette *Voevoda*, when proceeding from Hakodate to Peter the Great bay. It was seen at a distance of 3 miles from the ship at 7h. P M. on 28th June 1859, during thick weather, and estimated to be about 12 feet above water; the position assigned by dead reckoning, being lat. 42° 16′ N., long. 137° 18′ E.

The rock was searched for on two occasions by French vessels of war without success prior to 1886. In September 1886, eight of Her Majesty's ships passed near the assigned position of the rock, in such a manner that an area of 40 miles in latitude and 62 miles in longitude was examined, and no sign of the rock was observed.

In June 1888, an American whaling barque reported having seen two rocks from 8 to 12 feet high, about 500 yards apart, in lat. 42° 30′ N., long. 137° 5′ E., or about 15 miles north-westward of the *Voevoda's* reported position.

Consequent on this latter report a further special search has been made by five of Her Majesty's ships on the China station throughout 7th September 1889. During this search the position of the rocks reported by the American whaling barque, as well as that of the Waywoda rock, was passed over without seeing any signs of a rock above water, or obtaining any soundings indicative of shallow ground.

After a careful review of the above circumstances, it is considered that the objects seen by both the *Voevoda* and the American whaling barque were floating, and therefore the rock has been removed from the Admiralty Charts.

KIUSIU—NORTH-WEST COAST.

Sunken rocks in Iki Channel, and on south coast Iki sima.

THE British Admiralty has given notice (No. 434 of 1889) of the existence of the undermentioned sunken rocks lying in Iki channel, and on the south coast of Iki sima:—

1. A rock, with a depth of 1¾ fathoms, lies near the fairway in Iki channel, with Yebosi sima light-house bearing S. 75° E., and the eastern extreme of Na sima North.

   Position, lat. 33° 42′ 35″ N., long. 129° 52′ 20″ E.

2. A rock, with a depth of 2¼ fathoms, lies in Iki channel, with the north extreme of Na sima, in line with the Watch-house on Iki sima, bearing N. 87° W., and Akasi saki, the north-east extreme of Iki sima, N. 44° W.

   Position, lat. 33° 44″ 40′ N., long. 129° 54′ 10″ E.

3. A rock, with a depth of 1¾ fathoms, lies off the south coast of Iki sima, with Ko saki bearing S. 73° W., distant 4¼ cables.

   Position, lat. 33° 42′ 25″ N., long. 129° 43′ 30″ E.

4. A rock (*Tsurizone rock*), with a depth of 1¾ fathoms, lies 4¼ cables southward of Hira sima, with Ko saki bearing N. 86° E., and western extreme of Naga sima N. 7° W.

Position, lat. 33° 41′ 35″ N., long. 129° 37′ 50″ E.

5. A rock (*Sorazone rock*), with a depth of 3¼ fathoms, and 5 cables in extent in a north and south direction, lies nearly in the fairway of the southern entrance to Go no Ura, 6 cables distant from Tskuye sima, and with the north-west extreme of that islet in line with the north extreme of Hira sima.

Position, lat. 33° 43′ 5″ N., long. 129° 39′ 40″ E.

6. A rock (*Ozone rock*), awash at low water spring tides, is an extension of the shoal shown on Admiralty Chart No. 127, on the eastern side of entrance to Go no Ura; it lies 3¼ cables from the coast of Iki sima, with the south extreme of Haru sima bearing S. 86° W., and north-east extreme of Oö sima N. 45° W.

7. The rock (*Hirase rock*) in the northern part of Go no Ura, and shown on Admiralty Charts as "Covers," lies a little westward of the position given, with Tskuye sima bearing S. 27° W., distant $1\frac{8}{10}$ miles.

CAUTION.—There are many rocks and shoals near the coasts in this locality as yet not charted. Careful navigation is therefore needed.

The depths given are at low water spring tides.

NINE DEGREES CHANNEL.

Unsuccessful search for reef reported north-east of Minikoi Island.

THE following Notice to Mariners (No. 443 of 1889), issued by the British Admiralty, is republished with reference to Nos. 80 and 85, dated, respectively, the 23rd August and 6th September last, issued by this office :—

In consequence of a reef having been stated to exist in the Nine Degrees channel, about 50 miles north-east of Minikoi island, in lat. 8° 48′ N., long 73° 40′ E., by the Master

of the S.S. *Noord Braband*, August 1889, who reported it as being 3 miles in length in a south-east and north-west direction, an examination of the locality has been made by Commander R. F. Hoskyn, R.N., in charge of the India Marine Survey, with the following result :—

The examination, carried out in the I G.S.S. *Investigator*, and extending over three days, from 2nd to 4th November 1889, embraced the reported position of the reef between lat. 8° 35′ and 9° 5′ N., and long. 73° 15′ to 74° 0′ E. The least depth found on the suspected spot was 1,179 fathoms, gray ooze, and no indication was afforded by the soundings of the existence of shallow water. On one occasion, however, some patches of what appeared to be discoloured water were observed ; but they were all examined and proved to be merely the reflection of clouds in smooth streaks of water.

Throughout the time the weather was uniformly fine, and favourable for observations, and the positions of the soundings were satisfactorily determined.

Considering the detailed nature of this examination by Commander Hoskyn, and the fact of the locality being near the track of shipping using the Nine Degrees channel, the existence of this extensive danger is considered disproved.

Additional soundings north-eastward of St. Lazarus Bank.

WITH reference to Notice to Mariners, No. 67, dated 2nd July last, issued by this office, the British Admiralty has given notice (No. 403 of 1889) that some further soundings have been obtained by H. M. Surveying Ship *Stork* to the north-eastward of the bank as defined in that Notice, which indicate the existence of either another bank, or of an extension of the slope of the St. Lazarus bank for some 30 miles. No sounding less than 320 fathoms was obtained, but until the ground is more thoroughly searched, vessels should avoid passing over this area to the north-eastward of the St. Lazarus bank.

The soundings obtained are as follows:—

(1) Lat. 11° 55′ S., long. 41° 28′ E. ... ... 320 fathoms
(or 9 miles northward of a depth of 1,080 fathoms previously obtained).
(2) Lat. 11° 48½′ S., long. 41° 35$\frac{3}{10}$′ E. ... ... 460 fathoms.

INNER ROUTE.

Shoal north-eastward of two isles.

THE British Admiralty has given notice (No. 405 of 1889) of the existence of a coral shoal lying about 1½ miles north-eastward of two isles:—

This shoal, with a depth of 6 fathoms, is 8 cables in length within the 10-fathoms line in a north-east and south-west direction; from the shoalest part, South Direction island bears N. 13° E., distant 11 miles, and cape Flattery summit N. 76° W., distant $7\frac{7}{10}$ miles.

Position, lat. 15° 0′ S., long. 145° 30′ E.

Also the following information concerning g reef and Sand Bank, lying respectively about 5½ and 7 miles eastward of Two isles:—

g reef, as heretofore charted, does not exist.

Sand bank, now named g reef, is 4 cables in length in an east and west direction, with a width of 2½ cables, it is steep-to, and has a small sandy head near its west extreme which dries 6 feet at low water spring tides; from this head, cape Flattery summit bears N. 83° W., distant $13\frac{5}{10}$ miles, and South Direction island N. 18½° W., distant $10\frac{8}{10}$ miles.

Position, lat. 15° 0½′ S., long 145° 36′ E.

Unsuccessful search for shoal north-west of Look-out point.

FURTHER information has been received that a shoal spit extends in a north-westerly direction from Look-out Point for a distance of 2½ miles, having a least depth of 6 feet, with the summit of the point bearing S. 45° E., distant 2 miles; it is steep-to on its eastern edge, the water deepening quickly from 2 to 6 and 7 fathoms; on the north-western side it deepens more gradually.

The position heretofore given for the 2½ fathoms shoal is about 8 cables northward of the extreme of the spit, and depths of 6½ to 7½ fathoms, over even ground were obtained around that spot with no sign of shoal water.

Consequent on the foregoing, it is considered that the *Decapolis* grounded on the spit about 2 miles north-west of Look-out point, and the 2½ fathoms shoal has been removed from the Admiralty Charts.

NOTE.—Cape Flattery summit in line with the red beacon on Sand cay (about 2½ miles south-east of Look-out point), bearing S. 38° E., leads eastward of the shoal ground off Look-out point; and end of range in line with Round hill, bearing S. 82° W., leads 4 cables northward of it.

SIMONOSEKI STRAIT—WESTERN ENTRANCE.

Fixed light on Narusi rock.

THE British Admiralty has given notice (No. 415 of 1889) that on 21st September 1889 a light would be exhibited from the beacon (which has been rebuilt during the present year) on Narusi rock, north side of western entrance to Simonoseki strait:—

The light is a *fixed* white light, visible from the bearing of S. 86°E., through north, to S. 43° W.; it is elevated 17 feet above high water, and should be seen in clear weather from a distance of three miles.

The beacon, constructed of stone and circular in shape, is painted white.

Position, lat. 33° 54′ 45″ N., long. 130° 54′ 50″ E.

NOTE—The light is kept burning day and night by automatic arrangement without the constant attendance of a keeper. Should the light be extinguished by accident, there may be some delay in re-lighting it.

(*The bearings are Magnetic, and are given from seaward. Variation 4° Westerly in* 1889.)

HIGH COURT.
ENGLISH DEPARTMENT.
CRIMINAL.

IT has been brought to the notice of the Court that there is a diversity in the procedure followed regarding the levy of Court-fees in non-cognizable cases instituted by Municipalities or District Boards. Attention is, therefore, requested to Section 19, Clause XVIII of the Court Fees Act VII of 1870, under which no Court-fee is leviable on a complaint preferred by a Municipal Officer. Court-fees should, however, be levied for processes issued in non-cognizable cases instituted by such officers, such fees being, on conviction of the accused, recovered from him under section 31 of the Court-fees Act.

2. It should, however be noticed that the processes alluded to above do not come within Chapter V, Rule I, Sub-Rule III, page 91 of the Criminal Rules and Orders.

Prize Essay for Native Ladies.

THE following subject has been selected for Babu Brajamohan Dutt's Prize of Rs. 40 for the year 1889-90:—

"The present condition of Bengali Women."

The conditions for the award of the prize are—

(1) That the competition be open to all educated women, being natives of Bengal, without regard to age.

(2) That the prize be given for an essay, to be written in either Bengali or Sanskrit.

(3) That the essays be sent to the Central Text-Book Committee for adjudication within six months of the date of advertisement.

(4) That each essay be accompanied by the written declaration of the husband parent, or guardian of the competitor that, to the best of his belief, she has received no assistance of any kind, direct or indirect, in writing the essay.

Candidates are requested to send their essays, not later than the 30th June 1890, to the Secretary to the Central Text-Book Committee, Office of the Inspector of Schools, Presidency Circle, Calcutta. The envelope containing the essay should be superscribed "Brajamohan Dutt Prize Essay." The name of the successful competitor will be published in the *Calcutta Gazette*.

The winner of the prize in any year may, if she pleases, again compete. If she is adjudged to have sent in the best essay in such subsequent competition, her name will be published in the *Gazette*, but the prize will be awarded to the next eligible candidate.

No prize will be awarded if, in the opinion of the judges, the best essay sent in is not such as to deserve a prize.

A. CROFT,
Director of Public Instruction.

The 28th December 1889.

Examination of Candidates for Pleadership and Mookhtarship in Mofussil Courts subordinate to the High Court.

THE next examination of candidates for Pleadership will be held in the Senate House of the Calcutta University on *Wednesday and Thursday, the 19th and 20th of February* 1890, instead of on Monday and Tuesday, the 24th and 25th of February as originally notified.

The next examination of candidates for Mookhtarship will be held at Calcutta, Patna, Dacca, Cuttack, Gauhati, and Sylhet on *Wednesday and Thursday, the 19th and 20th of February* 1890, instead of on Monday and Tuesday, the 24th and 25th of February as originally notified.

Two papers will be set each day for the Pleadership Examination at 10 A.M. and 2 P.M., respectively, and the two papers for the Mookhtarship candidates will be set on the 19th February at the same hours.

Under no circumstances will any candidate be admitted to the examination-room after these hours.

The candidates will be required to produce at the examination extracts from the Register, which will be furnished to them by the District Judge through whom their applications have been sent to the Board of Examiners.

No candidate will be allowed to enter the examination-room with any memoranda or loose papers of any description (with the exception of the extracts abovementioned).

All writing materials will be provided, with the exception of pens, which the candidates must bring with them.

Pearl Fishery in Ceylon, 1890.

The following notice is published for general information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

PEARL FISHERY, 1890.

NOTICE is hereby given that a Pearl Fishery will take place at Marichikaddi, in the Island of Ceylon, on or about 20th February 1890. The bank to be fished is the Muttuvarathu Paar, 5 to 7½ fathoms water, lying off Dutch Bay, partly fished in March last, now estimated to contain oysters sufficient to employ 100 boats for 30 days with average loads of 8,000, each boat fully manned with divers per day.

2. It is therefore necessary that such boatowners and divers as may wish to be employed at the said fishery should be at Marichikaddi on or before 15th February next, and it is notified that the first day's fishing will take place on or about 20th February, if possible.

3. Marichikaddi is on the mainland, eight miles by sea south of Sillavaturai, and supplies of good water and provisions can be obtained there equal to Sillavaturai.

4. The fishery will be conducted on account of Government, and the oysters put up to sale in such lots as may be deemed expedient.

5. The arrangements of the fishery will be the same as have been usual on similar occasions.

6. All payments to be made in ready money in Ceylon currency.

7. Drafts on the Banks in Colombo or bills on the Agents of this Government in India, at ten days' sight, will be taken, on letters of credit being produced to warrant the drawing of such drafts or bills.

8. For the convenience of purchasers, the Treasurer at Colombo and the different Government Agents of Provinces will be authorised to receive cash deposits from parties intending to become purchasers, and receipts of these officers will be taken in payment of any sums due on account of the fishery.

9. No deposit will be received for a less sum than Rs. 250.

By His Excellency's command,

E. NOEL WALKER,
Colonial Secretary.

Patna Collectorate, the 6th January 1890. PEARY MOHAN BANERJEE, Dy. Collr., for Offg. Collector.

NOTICE is hereby given that or the undermentioned plots of the Nizamut lakhraj State lands situated in the district of Burdwan, Nos. 72 to 75 will be put up to sale on the spot by the Deputy Collector at the Burdwan Collectorate, and No. 89 by the Sub-divisional Officer of Culna, on Monday, the 27th January 1890, corresponding to 15th Magh 1296 B. S.

The purchasers will be subject to the following conditions of sale:—

Conditions of Sale.

1. The lands to be sold revenue-free to the highest bidder above the upset price, which will be fixed for each plot at the time of sale.

2. The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and the purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3. If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4. If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the lands to be again put up to sale at the risk of the defaulting purchasers, after issue of advertisement, as in the case of original sale.

5. The purchasers shall be put in possession on receipt of the orders of the Collector approving of the sales, but such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

Calcutta, the 31st December 1889. (3415—3)

Dinagepore District Board.

SIX PER CENT. LOAN.

THE Dinagepore District Board have resolved, with the permission of the Lieutenant-Governor of Bengal, to borrow Rs. 10,000 (out of two lakhs of rupees) during the current financial year (1889-90) for construction of permanent bridges in their district roads on security of the District Fund formed under Act III (B.C.) of 1885, detailed accounts of which for last two years were published in the *Calcutta Gazette*, Part IB, page 164, dated 7th August 1889.

2. Tenders for the whole or any part of the said amount of Rs. 10,000 will be received by the Vice-Chairman of the Board from this date to Friday, the 31st January 1890. Tenders must be in sums of Rs. 500) or multiples of Rs 500.

3. Each tender must be addressed in the form annexed herewith to the Vice-Chairman, and enclosed in a closed and sealed cover superscribed "Tender for Loan." If the tenderer is not resident in India, he must name an agent resident in India, to whom a letter of allotment may be issued if any part of the loan is allotted to such tenderer.

4. Each tender must be accompanied by deposit money, at a rate of 5 per cent. on the amount tendered, to be sent by postal money-order, and the money-order receipt must be filed with the tender. Deposits will, in the case of accepted tenders, be credited proportionally in part payment of the allotment certificates issued in respect of the tender. If any allotment certificate is not fully taken up, the deposit will be forfeited.

5. The rate at which a tender is made must not contain a fraction of an anna: if a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out, and the tender treated as if the rate did not contain such fraction of an anna.

6. The rate at which each tender is made must be specified in rupees, or rupees and annas. A tender in which no rate is thus specified, but a subscription is offered in some other terms, *e.g.*, at the recorded minimum, or at some specified percentage in addition to the recorded minimum, or at the average of the accepted tenders, will be rejected as null and void.

7. Tenders will be opened publicly by the Vice-Chairman at the Dinagepore Magistracy on Saturday, the 1st February next, at noon (Calcutta time).

8. Tenders at the minimum rate will be accepted in the order of the rates tendered, beginning with the highest rate. The amount allotted at the lowest rate at which tenders are accepted will be divided amongst those who have tendered at this rate in proportion, as nearly as may be found convenient, to the amounts of their tenders, provided that no allotment will be issued if the amount distributable on any tender is less than Rs. 500.

9. To each tenderer (or to his agent) whose tender is accepted in whole or in part, such number of allotment certificates as may be necessary to make up the aggregate amount allotted to him will be issued by the Vice-Chairman as soon as possible after the tenders have been accepted, and a list of the names of those to whom such allotment certificates are issued will be posted for general information at the District Board's Office.

10. Payment of any allotment certificate is to be made in credit of the District Fund at the Dinagepore Treasury.

Form of Tender

I, A B., hereby tender for Rs. (Rs. ,) of the six per cent. loan advertised in the *Calcutta Gazette*, dated , and agree to pay for the same subject to the condition mentioned in the advertisement, at the rate of Rs. As. for every hundred rupees allotted to me.

I enclose a money-order receipt for deposit money for Rs. sent to the address of the Vice-Chairman of the Dinagepore District Board.

Any allotment made to me may be communicated to at

NOTE.—A separate tender must be made at each rate tendered. The rate tendered should be the whole amount per centum, not the premium or discount: thus "one hundred and two" or "one hundred," or "ninety-nine," not "two per cent. premium" or "par" or "one per cent. discount."

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

ROUTE TO BE TAKEN BY EMIGRANTS DESPATCHED DIRECT FROM THE RECRUITING DISTRICTS TO DHUBRI.

GENERAL DEPARTMENT—INLAND EMIGRATION.

Calcutta, the 11th January, 1890.

RESOLUTION.

READ—

A letter No. 1641, dated the 19th December 1889, from the Superintendent of Emigration, Calcutta, and previous correspondence regarding the medical inspection of coolie emigrants to Assam at Naihati.

BY the notification, dated the 16th September, 1889, which was published at page 782 of Part I of the *Calcutta Gazette* of the 18th idem, the Lieutenant-Governor, in exercise of the power vested in him by section 3 of Act I of 1889, declared by an amendment of Rule 6 of the rules under that Act that the Hooghly-Naihati route should be adopted for emigrants to Assam. This order was intended to apply only to the emigrants taken from the recruiting districts to Dhubri and crossing the Hooghly above Calcutta, who, in fact, constitute the majority, the object being to exclude the alternative crossings *viâ* Mugra and Kanchrapara. It was not intended to interfere in any way with emigration *viâ* Calcutta and Goalundo. As the rule has been differently interpreted, this explanation is published for general information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

RESOLUTION.—The Lieutenant-Governor notices with pleasure that the contributions for works of public utility during the year under review compare favourably with those of the previous two years. His Honour hopes to see further progress in the same direction, and he trusts that those who are willing to contribute money for this purpose will exercise a careful judgment in selecting such works as are calculated to enhance the material prosperity of the community. The Lieutenant-Governor desires to thank those who have contributed in the past year for their public spirit and liberality.

Letters of acknowledgment will be forwarded by the Government to those who have constructed important works. Those who have constructed works

costing Rs. 500 and under will, as usual, receive an acknowledgment from the Commissioner or the Magistrate of the Division.

ORDER.—Ordered that a copy of this Resolution, and of the statement, be forwarded to the Board of Revenue, Lower Provinces, and to all Commissioners of Divisions; to the Commissioner of Chota Nagpore, and to all Superintending Engineers of Public Works Circles in Bengal, for information.

Ordered also, that a copy of this Resolution, and of the statement, be forwarded to the Revenue and Judicial Departments of this Government for information.

Ordered also, that this Resolution and the statement be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

E. J. MARTIN,

Secretary to the Government of Bengal,

P. W. Dept.

PUBLIC WORKS DEPARTMENT,—BENGAL.

IRRIGATION.

THE following Note on irrigation operations from the Sone Canals during the kharif season 1889-90 is published for general information.

By order of the Lieutenant-Governor of Bengal,

C. W. I. HARRISON, *Lieut.-Col.*, R.E.,
Offg. Joint-Secy. to the Govt. of Bengal, P. W. Dept.

Note by C. W. ODLING, Esq., *Superintending Engineer, Sone Circle, on irrigation operations from the Sone Canals during the kharif season* 1889-90,—*dated* 12*th January* 1890.

1. The season, though the rainfall was at times in defect, was on the whole not an unfavourable one so far as the rice crop was concerned, rain continuing to fall to a later date in September than was the case in the previous year. The main features of the rainfall during the two years are shown in the table below :—

Comparative statement of rainfall during the years 1888 *and* 1889.

Months.	Recording Stations.				
	Arrah.	Buxar.	Bankipore.	Dehree.	
	Inches.	Inches.	Inches.	Inches.	
July 1889	13·58	16·89	8·84	7 22	
August „	13·68	11·09	9·49	19·21	
September „	5·15	6·00	15·70	7·00	
October „ .. .	0 92	1·02	0 05	2 84	
Total ...	33 33	35·00	34·08	35·77	34·55 average.
July 1888	17·90	12·11	15·14	15·90	
August „	17 74	13·39	17·11	15·36	
September „	5 58	11·25	3 17	7·93	
October „	0·43	0·60	Nil	1·36	
Total ...	41·65	37·35	35·42	40 55	38·74

The rainfall during 1889 was little, if at all, below the normal rainfall, which is 41·25 inches for the *year*, for the area commanded by the Sone Canals. There was, however, except at Bankipore no rain until the last day of the *Hutia* (25th September to 8th October), and the fall during the whole month of October was scanty and made up of insignificant showers.

There was a fall of ¼ of an inch at Arrah on the 7th October, none elsewhere.

2. The area irrigated during the season, and during the corresponding periods of 1888, 1887 and 1886, are shown in the statement following :—

	Five-year leases.	Annual kharif.	Sugarcane.	Kharif rainfall, July to October, inclusive average of head-quarters stations.
	Acres.	Acres.	Acres.	
1889-90	216,000	38,500	5,626	34·55
1888-89	200,102	69,628	4 600	39·12
1887-88	210,164	57,595	6,265	26·65
1886-87	194,556	30,082	11,626	49·40

The figures for 1889-90 are approximate, as the complete areas have not yet been reported, but on the information at present available the total area irrigated was 260,000 acres against 274,330 acres in 1888-89.

The deficiency is wholly in annual kharif leases, the five-year leases having increased by 16,000 acres, notwithstanding the lapse of leases for 45,445 acres on the 1st April 1889. Applications for 5-year leases for 29,788 acres were refused for want of proper channels or other good reasons. The falling off in the area under irrigation, compared with the previous year, shows how much more patent a factor is the time at which rain occurs than the total rainfall of the season or year.

3. The discharge of the canals during the thirty days of greatest demand for the last two years is shown in the subjoined abstract: —

Period	Discharge in cubic feet per second.			
	Eastern Main Canal.	Western Main Canal.	Arrah Canal system.	Buxar Canal system.
1889.				
September, 21st to 30th ...	1,021	1,805	1,006	770
October, 1st to 10th ...	1,482	3,357	2,008	1,247
Do., 10th to 20th ...	1,457	3,474	2,155	1,296
1888.				
September, 21st to 30th ...	1,057	2,138	1,700	551
October, 1st to 10th ...	1,439	3,427	2,076	1,225
Do., 10th to 20th ..	1,450	3,858	2,360	1,492

It will be noticed that the demand for water during the first twenty days of October was not materially less than in 1888.

4. The same precautions as were reported last year have been taken to confine the supply of water to leased areas.

5. The report is submitted by me, as I was in charge of the circle during the *kharif* season.

O. W. Odling,

Superintending Engineer on Special duty.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓ dew; — fog.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, DURING THE MONTH OF DECEMBER 1889.

THE normal meteorology in December of Bengal and Assam is usually very simple, and the north-east monsoon conditions are almost always present in a well-marked degree. Temperature generally steadily diminishes, and is decidedly low, while pressure increases and becomes very high; humidity remains low, and there is an almost complete absence of cloud. Rainfall is also usually entirely absent from the province, except when the normal conditions become almost reversed by the occurrence of barometric disturbances which appear over Northern India, and drift in a southerly or south-easterly direction. When such depressions pass through the province, the sky becomes heavily clouded, temperature usually increases, particularly at night, while pressure falls with the advance of the depression. If the depression is at all considerable, general light rain will also usually fall. It is from such actions as these that practically the whole of the rainfall of December in Bengal is in most years received, and from the nature of the case the occurrence of any rainfall at all in this month is uncertain, while its amount is always liable to considerable variation. A second class of disturbances may occur in the form of cyclonic storms in the Bay; but usually in December such storms are generated in the extreme south of the Bay, and they are rarely sufficiently large and intense to affect the weather in Bengal to any considerable extent. If, however, such a storm should happen to advance in a north-westerly direction into the northern half of the Bay, then again the normal weather conditions in Bengal will be practically reversed and will become similar to those described as occurring during the passage of the land-formed storms. In this case, however, the rainfall as a rule will be entirely confined to the southern districts of Bengal, and will not penetrate at all into such districts as Behar.

The average rainfall in Bengal is therefore small in all districts; it is slightly over half an inch in Orissa, about equal to a third of an inch in Chutia Nagpur and East Bengal, and to about a fifth of an inch in South-West Bengal and South Behar; while in North Bengal and North Behar the average fall is even less than a fifth of an inch.

Meteorology of the month.—The chief features in the meteorology of December have been—

1st.—The complete absence of storms of the usual cold-weather type which form in Northern India and advance in a south-easterly direction.

2nd.—The occurrence of two cyclonic storms in the Bay: the first more or less of the usual character, which formed in the south of the Bay and advanced in a westerly direction across the extreme south of the peninsula, while the second was a most abnormal storm. It occurred very much later in the year than cyclonic storms have usually hitherto been formed. It was also formed rather further north than usual, and finally drifted in a north-westerly direction towards the North Madras coast. It was also a very severe storm.

3rd.—The pressures recorded in Bengal were in all cases below the normal, the usual defect averaging about two or three-hundredths of an inch; the defects were generally greatest over an area represented by such stations as Bankipur, Bhagulpur, Burdwan, and Berhampur on the west and Dhubri on the east, where the defect equalled about four-hundredths of an inch.

4th.—Temperature was in excess for the greater part of the month, and the mean temperature for the province of Bengal was about one and-a-half degrees in excess of the normal, while in Assam the excess was larger than two degrees.

5th.—The air was decidedly more moist than usual, the excess in the percentage of humidity ranging up to seventeen per cent. at Jessore.

6th.—Cloud proportion was above the normal in the southern districts and below it over the northern half of the province

7th.—As there were no land-formed or cold-weather storms, there was no general rainfall over the province; but owing to the nature of the second cyclonic storm in the Bay referred to above, moderate showers were received in some of the southern districts of the province

The first half of December was a period during which north-east monsoon conditions were present in Bengal and over the greater part of the Bay in fairly well pronounced degree. In Bengal itself temperature and humidity were low and pressure rather high, while a steady northerly wind current blew over the whole province, the skies were almost cloudless, and rainfall was entirely absent. In the Bay also fine weather was reported during the whole of this period, and there was an almost complete absence of rain along the Madras coast, though at this period rain generally occurs here. On the 16th of December however, conditions commenced to change in the south of the Bay, pressure began to fall along the South Coromandel coast, while elsewhere it was rising, and winds along the Burma coast showed indraught towards a disturbed area in the south of the Bay. It is probable on this day a small cyclonic storm had formed in the extreme south of the centre of the Bay. On the morning of the 17th it had advanced in a westerly direction, and the centre was then probably to the north-east of Trincomalee and east-south-east of Negapatam. On the morning of the 18th the storm had commenced to cross the south of the peninsula, and the centre was at 8 a.m. a short distance to the south-south-west of Negapatam. It afterwards apparently entirely crossed the peninsula. It was a storm in which the winds were of only moderate violence, and squally weather only obtained along the Coromandel coast, but a heavy wave of

rainfall was brought by the storm and gave to the Madras coast and the south of the peninsula general and rather heavy rain, which lasted for several days. The storm, however, was too far distant from Bengal to cause any considerable alteration in the weather, and up to about the 20th of the month the conditions in Bengal remained those of the ordinary north-east monsoon, as previously described. At this time a severe storm was formed in the Bay, the description of which, as given in the weekly report, is as follows:—

On December 21st conditions in Bengal remained unaltered, but skies clouded up heavily over the south of Burma. Drizzling rain commenced over this area, and pressure fell slightly at Diamond Island, while elsewhere it was generally rising. Winds also at the South Burma stations commenced to show distinct indraught towards the south of the Bay and at Diamond Island, instead of the light winds usual at this season, winds had increased to almost a gale. On this day, therefore, it is clear that weather had became very disturbed over the south of the Bay, and it is probable that a cyclonic storm had commenced to form. On the 22nd the area of stormy weather was still quite in the south of the Bay and probably about Longitude 88° E. The storm, therefore, appeared on this day to have drifted in a westerly direction, and probably the centre of the storm was not further north than Negapatam. At this time all the indications appeared to point to the probability that the storm would advance across the extreme south of the peninsula, or even across the north of Ceylon. On the morning of the 23rd, the storm was probably to the east-north-east of Negapatam and at some distance from land, and it was moving slowly in a north-westerly direction. On the 24th it had again advanced in a north-westerly direction, and its centre was probably to the east of Nellore or east-north-east of Madras; while on the morning of the 25th it had come much nearer the land, and its centre was to the south-east of Masulipatam. Even on the morning of the 25th it was apparent that the storm had ceased to intensify, but it was on this date a rather severe storm; but by the morning of the 26th, and particularly from midnight of the 25th, the storm had commenced to fill up rather rapidly. On this date it had become only a barometric depression, but it was accompanied by fairly strong winds, and the position of its centre was decidedly nearer the land than on the previous day, and it was perhaps even a little to the south-west of its previous position. On the morning of the 27th the depression had quite passed inland, the centre crossing the coast apparently between Masulipatam and Nellore during the afternoon or evening of the 26th. The storm in its progress was accompanied by only a moderate barometric depression as indicated by the readings at the coast stations, but it will be observed that the storm centre was at no time very near to any meteorological station while it existed as a severe storm. Decidedly low pressures, however, appear to have been experienced by the vessel *Java* which was involved in the storm. The strength of the winds in the northern half of the storm was decidedly great, and for two days a gale of wind was blowing at some of the ports on the west coast. Certain observations taken on board the S.S. *Java*, which was involved in the storm, also show that hurricane winds and very severe weather accompanied the northern half of the storm, but winds in the southern half appear to have been comparatively feeble The rainfall in connection with the storm at the land stations was also only moderate.

As is usually the case, directly a rather severe storm is formed in the Bay, weather conditions commenced to change in Bengal. Temperature at first began to rise slowly, but from about the 23rd or 24th, when the skies had clouded over quickly, the night temperatures rose very rapidly and became very high. The storm in its north-westerly advance apparently also caused a wave of moist winds from the sea to advance over Bengal, and on about the 24th at many stations the sky was almost overcast, while humidity as well as temperature was high. In Orissa and South-East Bengal, and in parts of South and even North Bengal, so much moisture was thus brought up that light showers commenced to fall at a few stations, and dull and rather gloomy weather obtained for some days At this period, therefore, the general conditions were almost the reverse of normal north-east monsoon weather, but with the gradual breaking up of the storm on the 26th, and with its disappearance inland on the 27th, conditions had begun slowly to improve again in Bengal on the 26th and 27th of the month, and at the close of the month again fine weather with almost cloudless skies, rather rapidly reducing temperature with fairly low humidity, an increasing pressure, and complete absence of rain again obtained; or, in other words, again normal cold-weather conditions had set in over the province.

Pressure.—The variations of pressure during the month were not of any great importance. The mean pressure at the commencement of December varied from a twentieth to a tenth of an inch below the normal. During the second week of the month, when the cold-weather conditions were present rather strongly, the mean pressure became almost normal, and this continued to be the case up till the last week, when the conditions generally became influenced by the existence of the severe storm in the Bay, when pressure was again in distinct defect of the normal. For the whole month, therefore, the mean pressure has been generally below the normal by amounts varying from two to four-hundredths of an inch. The largest defects were generally registered at Bhagulpur, Bankipur, Burdwan, Bankoora, and Berhampore, in the western districts of the province, and at Dhubri in Assam, and at Chittagong in the eastern districts; but even in these cases the defects do not exceed four-hundredths of an inch.

Temperature.—The temperature variations during the month have been rather large. At the commencement the mean temperature was nearly normal; for the second week a general

defect of about a degree was registered, but in South-West Bengal there was a defect of about three degrees. In the third week the mean temperature had become almost normal, but in the fourth week, owing to the influence of the disturbed conditions brought about by the storm in the Bay, a very rapid increase in the night temperatures took place, and temperature generally became rather largely in excess of the normal; the excess in South-West and East Bengal and in South Behar averaging from five to six degrees. For the whole month, therefore, the average mean temperature has been above the normal, the excess ranging from about one degree in Orissa and South-West Bengal to nearly two degrees in East and North Bengal, while in Assam the excess is larger than two degrees. The general variation of temperature from the normal during the month is best shown by the following table, which gives the variations of the average maximum, minimum and mean temperatures at nine typical stations in different districts in the province from the normal values, week by week, throughout the month:—

Rainfall.—As previously stated, rain occurred towards the end of the month in some of the southern districts in connection with a wave of moist winds brought up by the storm in the Bay. The only districts, however, which received any rainfall of importance were the Pooree district in Orissa and the Chittagong, Chittagong Hill Tracts, Backergunge, and Noakholly districts of East Bengal. A few showers were also received in the following districts:—Cuttack, Khoolna, and Pubna. The falls in East Bengal generally averaged 0·15 inch and in Orissa 0·12 inch, but elsewhere they were of no importance.

The following table gives in a condensed form the summary of the rainfall information in Bengal for the whole year. It gives a comparison between the actual monthly and total rainfall of the year, with the normal values in each of the seven meteorological divisions of Bengal; the actual falls being expressed as percentages of the normal amounts. From these figures it will be seen that all the districts, except Chutia Nagpur, have received good falls during the year, while in Chutia Nagpur there has been a defect of 17 per cent.:—

* Means of six days. | † Means of five days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last [illegible] years. *Humidity* of the atmosphere is expressed as percentage saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number of [illegible] numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station for the period in question during the past [illegible] stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 10th of January 1890.

CALCUTTA, *the* 14*th January* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 10TH JANUARY 1890.

NORMAL north-east monsoon conditions obtained over the whole of Bengal throughout the previous week. Over the greater part of the province similar conditions have again prevailed during the present week, but there has been an exception to the prevailing fine weather over a part of the north, and to a smaller extent over part of the centre, of the province, from the fact that a very feeble area of relatively low pressure was formed on the 5th which included many stations in the centre of the province, stretching from Dinagepur on the north to Jessore in the south and from Bankoora on the west to Serajgunge in the east, and round which there was a feeble kind of cyclonic circulation of winds, the centre of the circulation being to the east of Berhampore The feeble area of low pressure was again perceptible on the 6th, the centre being apparently a little north of its position on the previous day, and again there was a slight circulation of winds round the centre. On the 7th the lowest pressure in the province was at Bogra, near which apparently the feeble low-pressure area again existed, but on the 8th pressure had become slightly low over a part of North and East Bengal, while on the 9th the lowest pressure in the province had retreated southwards to Burrisal, when conditions became practically normal again. It will be thus seen that there was a tendency for slightly disturbed conditions to set in over the centre and north of the province for the period, the 6th to the 9th of January. The disturbance was, however, not sufficient to do more than give slightly cloudy weather at some of the stations in the centre of the province, but in the hills and at the stations nearest the hills the disturbance showed itself by giving rather heavily-clouded skies and light rain showers. These showers were practically entirely confined to the Julpigoree, Cooch Behar, and Darjeeling Hills districts. In most cases the falls were slight only, and the only station which received a fall larger than half an inch was Kurseong.

Over the remainder of the province fine north-east monsoon weather has continued, though, as is frequently the case when weather is slightly disturbed, temperature and humidity have been somewhat high ; but the skies have remained almost cloudless, and rain has been entirely absent from the remainder of the province for the whole week.

Pressure—On the 4th of January fell very slowly at some of the stations in the centre of the province, while it was rising at some of the stations in East and North Bengal. A further general fall took place on the following day except at some of the south-eastern stations. On the 6th a rather rapid rise took place, which was continued on the 7th, but on the 8th pressure had fallen moderately again, though there was again a rise at the end of the week. For the whole province for the week the mean pressure has been considerably in defect of the normal, the average defect ranging from about five to eight-hundredths of an inch.

Temperature—Has been generally increasing during the week, and in all districts, except Orissa, the mean temperature has been rather considerably in excess of the normal, the excess ranging up to more than four degrees in East and North Bengal. For the whole province the mean temperature has been 2·8° in excess of the normal

The general distribution of temperature during the week, its range from day to night, and its variation from the normal, are best shown in the following table, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal It will be seen that both day and night temperatures have been in excess of the normal, the night temperatures, if anything, showing rather the greater excess :—

Rainfall.—A few showers have fallen in the Julpigoree, Cooch Behar, and Darjeeling Hills districts, but the falls are as a rule small. The largest fall is one of 0·63 inch at Kurseong and of 0 42 inch at Nagrakotta, but in all other cases the falls have been less than a quarter of an inch In other districts, beyond a slight shower at Rungpore, there has been absolutely no rain.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 10th of January 1890 :—

MEMORANDUM.

THE total number of deaths registered during the month of November 1889 in the districts of Bengal amounted to 147,795, against 148,610 in the preceding month, 138,989 in November 1888, and an average of 155,663 in the corresponding months of the previous five years 1884—88. These figures correspond to annual death-rates of 26·88, 27·00, 25·44 and 28·20 respectively. It will thus be seen that while the death-rate for November 1889 was less than that of the preceding month and of the average mortality of November, it was in excess of the mortality of November 1888. Of the 147,795 deaths registered in November 1889, 76,066, or 27·84 per thousand, were males and 71,729, or 25·92 per thousand, were females.

2. The highest death-rates were returned in order of sequence from the following districts. For comparison the mortality in them during November 1888 is also exhibited :—

3. The following statement compares the rates of mortality under the several heads of disease during the three periods, viz., November 1889, 1888, and the average for that month of the five years 1884—88 :—

	Ratio per *mille* during—		
	November 1889.	November 1888.	Mean of previous five years, 1884—88.
Cholera	·96	1·32	1·92
Small-pox	·01	·03	·02
Fever	20·76	19·56	21·60
Bowel-complaints	·72	·60	·84
Injury	·24	·01	·24
Other causes	3·84	3·48	3·36

The only noticeable point indicated by the above figures is that cholera was considerably less fatal in November 1889 than in either of the past periods with which that month is compared, and that fever as compared with November 1888 has increased somewhat.

4. In the statement below the districts are exhibited in which the highest proportions of deaths were recorded :—

5. The following table exhibits the death-rates among the five principal *classes* which comprise the population of the Bengal province, viz., Hindus, Mahomedans, Other classes, Buddhists, and Christians, arranged so as to show the graduated rates of mortality among them respectively :—

Classes.	Ratio per *mille*—	
	Nov. 1889.	Nov. 1888.
Hindus	27·48	24 84
Mahomedans	26 52	27 12
Other classes	16·20	18·60
Buddhists	15 48	15 84
Christians	14·64	15 48

6. Referring to mortality in relation to *Age*, infants under one year furnished a death-rate of 190·32 per 1,000 of the living, against 172·32 per 100 in November 1888, and old men of 60 years and upwards of 73·08 per 1,000, against 64·68 in November 1888. The mortality under the other groups of ages ranged from 38·52 per 1,000 among persons between 50 and 60 years of age to 12·00 per 1,000 among persons between 10 and 15 years. The corresponding proportions in November 1888 were 35·04 and 11·88 respectively.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,

The 13th January 1890.

W. H. GREGG, *Dip. Publ. Health, Camb.*,

Sanitary Commissioner for Bengal.

MEMORANDUM.

THE principal Municipalities in Bengal returned, during the week ending 28th December 1889, the birth and death-rates of 24 and 27·9 per 1,000 of population, respectively, as opposed to 25·2 and 30 2 per 1,000 in the preceding week ending 21st December, indicating a falling off in the registration of both births and deaths.

2. These events were returned in the highest proportions by the following Municipalities :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Ranaghat	59·9	Poori	73·4

Comparative Statement of traffic, Eastern Bengal State Railway, for October 1889.

INCREASES.

	Tons
Jute, screwed	2,624
Is due to extensive despatches during the month from Goalundo, Rungpore, Kaunia, and Haldibari chiefly.	
Hay, straw and wooloo	35
From Mogra Hât principally.	
Firewood	175
From Bansra and Canning principally.	

DECREASES.

Coal	1,744
Due to sufficient stock for railway and flotilla purposes.	
Rice	4,861
This decrease is due to a partial failure of the crops.	
Jute, unscrewed	21,614
Heavy decrease is due to the dulness of the market, and an increase in the despatches of baled jute, and also to the jute crop having come down unusually earlier in 1888.

Comparative Statement, Bengal Central Railway, for October 1889.

INCREASES.

	Tons.
Coal	138
This slight increase is probably due to a greater demand required for railway and flotilla consumption.	

DECREASES.

Jute	6,846
There was no great demand, and the market was steadily dull throughout this month.

General remarks on the fluctuation of staples carried over the East Indian Railway during four weeks ended 23rd November 1889.

INCREASES.

Cotton.—The increase under this head is due to despatches of cotton from stations in the North-Western Provinces to Calcutta for export and to Bombay for local consumption.

Indigo.—Due to the season this year being earlier than last.

Fruits, other kinds.—This was in betelnuts from Howrah.

Minerals.—Principally in lime from Rajband, Durgapur, Raneegunge, and Asansol on the chord line and from Katni on the Jubbulpore line for Calcutta.

Brass and Copper.—This increase was in despatches of the unmanufactured article from Howrah and of manufactured ware from Mirzapur; the corresponding month of 1888 showed a heavy decline in the brass and copper traffic owing to the high rates then prevailing.

Oil.—This increase was in kerosine oil from Howrah.

Potatoes.—Due chiefly to despatches of hill potatoes from the North-Western and Oudh and Rohilkhand Railways.

Other rain and spring crops.—There was a decrease in the weight carried attended with an increase in earnings, and this was principally due to there having been in 1888 a heavy short-distance traffic coming to us from the Bengal and North-Western Railway.

Railway material, Foreign.—The increase was due to considerable despatches, during the early portion of the month, of permanent-way materials for the Delhi-Umballa-Kalka Railway.

Salt.—This was chiefly in the despatches of salt from Howrah.

Saltpetre.—The increase was principally from Patna and from the Bengal and North-Western and Oudh and Rohilkhund Railways to Howrah.

Stone.—Chiefly in despatches of road metal from Pakur on the loop line to Calcutta.

Sugar and jaggree.—In earnings the largest increase was from stations on the Patna-Gya line, which despatch principally to the Great Indian Peninsula Railway *vid* Jubbulpur. In weight carried we dealt with a heavy cross and short-lead traffic from the Oudh and Rohilkhund Railway *vid* Aligarh and the North-Western Railway.

Tobacco.—Principally from Barh and the Tirhoot State Railway.

DECREASES.

Coal and coke.—In upwards traffic there was an increase in the weight carried attended with a decrease in the earnings, and this was due to the shorter average lead. The decrease in the downward traffic is due to consignments for export having been held back owing to a difficulty in obtaining steamers in which to ship coal.

Piece-goods.—The decrease was principally in despatches from Howrah, which were very brisk during the corresponding period of 1888.

Jute, raw.—The decrease was principally in traffic from the Assam-Behar State Railway *vid* Sahebgunge owing to the jute crop in the Purneah district having suffered this year owing to floods.

Wheat.—Due to there being no demand for export to Europe.

Gram and Pulses.—There were exceptional despatches last year from Delhi and the Punjab to Howrah to meet requirements on the east coast, where a famine was apprehended.

Rice (husked and unhusked).—There was an increase in the downward traffic, but despatches up-country fell off owing to there having been an exceptional demand last year.

Hides and skins.—The decrease was principally in despatches from the Tundla district to Howrah owing to want of demand.

Lac.—Principally in shellac from Mirzapur to Howrah.

Iron.—The decrease was principally in consignments from the Barakar Iron Works and in despatches of sugarcane rollers from Delhi and Delhi-Shahdara.

Opium.—Despatches were held over by the Government authorities owing to unsettled weather.

Seeds.—The decrease was chiefly in linseed, and was due to exhaustion of stocks.

YEZO—SOUTH-WEST COAST.

Non-existence of Waywoda rock.

THE British Admiralty has given notice (No. 422 of 1889) of the non-existence of Waywoda (Voevoda) rock in the sea of Japan.

This rock was originally reported by the Russian corvette *Voevoda*, when proceeding from Hakodate to Peter the Great bay. It was seen at a distance of 3 miles from the ship

at 7h. P.M. on 28th June 1859, during thick weather, and estimated to be about 12 feet above water; the position assigned by dead reckoning, being lat. 42° 16′ N., long. 137° 18′ E.

The rock was searched for on two occasions by French vessels of war without success prior to 1886. In September 1886, eight of Her Majesty's ships passed near the assigned position of the rock, in such a manner that an area of 40 miles in latitude and 62 miles in longitude was examined, and no sign of the rock was observed.

In June 1888, an American whaling barque reported having seen two rocks from 8 to 12 feet high, about 500 yards apart, in lat. 42° 30′ N., long. 137° 5′ E., or about 15 miles north-westward of the *Voevoda's* reported position.

Consequent on this latter report a further special search has been made by five of Her Majesty's ships on the China station throughout 7th September 1889. During this search the position of the rocks reported by the American whaling barque, as well as that of the Waywoda rock, was passed over without seeing any signs of a rock above water, or obtaining any soundings indicative of shallow ground.

After a careful review of the above circumstances, it is considered that the objects seen by both the *Voevoda* and the American whaling barque were floating, and therefore the rock has been removed from the Admiralty Charts.

By direction of the Government of Bengal,

EATON W. PETLEY,
Port Officer of Calcutta.

Sunken rocks in Iki Channel, and on south coast Iki sima.

THE British Admiralty has given notice (No. 434 of 1889) of the existence of the undermentioned sunken rocks lying in Iki channel, and on the south coast of Iki sima:—

1. A rock, with a depth of 1¾ fathoms, lies near the fairway in Iki channel, with Yebosi sima light-house bearing S. 75° E., and the eastern extreme of Na sima North.
   Position, lat. 33° 42′ 35″ N., long. 129° 52′ 20″ E.
2. A rock, with a depth of 2¼ fathoms, lies in Iki channel, with the north extreme of Na sima, in line with the Watch-house on Iki sima, bearing N. 87° W., and Akasi saki, the north-east extreme of Iki sima, N. 44° W.
   Position, lat. 33° 44″ 40′ N., long. 129° 54′ 10″ E.
3. A rock, with a depth of 1¾ fathoms, lies off the south coast of Iki sima, with Ko saki bearing S. 73° W., distant 4¼ cables.
   Position, lat. 33° 42′ 25″ N., long. 129° 43′ 30″ E.
4. A rock (*Tsurizone rock*), with a depth of 1¾ fathoms, lies 4¼ cables southward of Hira sima, with Ko saki bearing N. 86° E., and western extreme of Naga sima N. 7° W.
   Position, lat. 33° 41′ 35″ N., long. 129° 37′ 50″ E.
5. A rock (*Sorazone rock*), with a depth of 3¼ fathoms, and 5 cables in extent in a north and south direction, lies nearly in the fairway of the southern entrance to Go no Ura, 6 cables distant from Takuye sima, and with the north-west extreme of that islet in line with the north extreme of Hira sima.
   Position, lat. 33° 43′ 5″ N., long. 129° 39′ 40″ E.
6. A rock (*Ozone rock*), awash at low water spring tides, is an extension of the shoal shown on Admiralty Chart No. 127, on the eastern side of entrance to Go no Ura; it lies 3¼ cables from the coast of Iki sima, with the south extreme of Haru sima bearing S. 86° W., and north-east extreme of Oō sima N. 45° W.

7. The rock (*Hirase rock*) in the northern part of Go no Ura, and shown on Admiralty Charts as "Covers," lies a little westward of the position given, with Takuye sima bearing S. 27° W., distant $1\frac{6}{10}$ miles.

CAUTION.—There are many rocks and shoals near the coasts in this locality as yet not charted. Careful navigation is therefore needed.

The depths given are at low water spring tides.

NINE DEGREES CHANNEL.

Unsuccessful search for reef reported north-east of Minikoi Island.

THE following Notice to Mariners (No. 443 of 1889), issued by the British Admiralty, is republished with reference to Nos. 80 and 85, dated, respectively, the 23rd August and 6th September last, issued by this office :—

In consequence of a reef having been stated to exist in the Nine Degrees channel, about 50 miles north-east of Minikoi island, in lat. 8° 48′ N., long 73° 40′ E., by the Master of the S.S. *Noord Braband*, August 1889, who reported it as being 3 miles in length in a south-east and north-west direction, an examination of the locality has been made by Commander R. F. Hoskyn, R.N., in charge of the India Marine Survey, with the following result :—

The examination, carried out in the I.G.S.S. *Investigator*, and extending over three days, from 2nd to 4th November 1889, embraced the reported position of the reef between lat. 8° 35′ and 9° 5′ N., and long. 73° 15′ to 74° 0′ E. The least depth found on the suspected spot was 1,179 fathoms, gray ooze, and no indication was afforded by the soundings of the existence of shallow water. On one occasion, however, some patches of what appeared to be discoloured water were observed; but they were all examined and proved to be merely the reflection of clouds in smooth streaks of water.

Throughout the time the weather was uniformly fine, and favourable for observations, and the positions of the soundings were satisfactorily determined.

Considering the detailed nature of this examination by Commander Hoskyn, and the fact of the locality being near the track of shipping using the Nine Degrees channel, the existence of this extensive danger is considered disproved.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 21st January 1889.—In exercise of the power conferred on the Local Government by section 414 of Act II (B.C.) of 1888, the Lieutenant-Governor has been pleased to confirm the following bye-laws which have been made by the Commissioners of Calcutta under section 412, clauses (*a*), (*b*), (*c*), and (*d*), and published in the manner prescribed in section 415 of the Act.

* (*a*) All matters and things connected with the supply and use of water—

Washing animals in the streets.

1. No person shall wash or cleanse, or cause to be washed or cleansed, in any public street, lane, or thoroughfare, or in upon, or by the side of, any tank, reservoir, bathing place, aqueduct, well, cistern, conduit, or other water-works belonging to the Commissioners and provided by them for the domestic use of the inhabitants of the town, any vehicle, carriage, or cart, dog, horse, or other animal.

Washing apparel, &c.

2. No person shall wash, cleanse, or cause to be washed or cleansed, in any public street, lane, or thoroughfare, or in, upon, or by the side of, any tank, reservoir, bathing place, aqueduct, well, cistern, conduit, stand-pipe, or other water-works belonging to the Commissioners (and provided by them for the domestic use of the inhabitants of the town) any wool, cloth, or wearing apparel, or any utensil for cooking or other purposes, or leather, or skins of any animal, or any foul or offensive thing, unless specially set apart by the Commissioners for that purpose.

Stop-cocks, taps, and ferrules to be approved by Commissioners.

3. All stop-cocks, taps, and ferrules for new connections shall be of a pattern approved of by the Engineer to the Corporation.

Occupier to effect repairs in case of leakage.

4. Should any leakage occur in a communication pipe, cistern, tap, or other water fittings, the occupier, or, in case of a vacant house, the owner shall within 48 hours engage an authorized plumber, who shall be bound to effect the repairs within a further period of 12 hours.

Water for ornamental or business purposes to be taken through meter.

5. Water for ornamental or business purposes must, unless otherwise agreed upon under section 154, be taken through a meter, the working of which is to be approved of by the Engineer to the Corporation. The meter shall be provided, and any repairs which may be necessary from time to time shall be carried out at the cost of the person taking the supply. The meter shall be of a pattern, and be fixed in a position to be approved of by the Commissioners.

Usual deduction to be allowed.

6. In calculating the sum payable for water under Rule 5, the allowance prescribed by section 155 shall be deducted from the amount consumed, and only the surplus consumption charged for at the rate of 2,000 gallons per rupee.

Cistern not to be put up or its size increased without sanction of the Commissioners.

7. No person shall put up any cistern at any latrine or water closet, or otherwise, or increase the size of such cistern without the previous sanction of the Commissioners.

Prohibition for bathing or using water of a tank for drinking purposes, &c.

8. Whenever a public notice has been issued under section 323, Act II (B. C.) of 1888, prohibiting the removal or use of the water of any particular tank for the purpose of drinking, no person shall, so long as such public notice is in force, bathe in such tank or take away the water thereof whether in a gumlah, mussuck, kulsee, water-cart or any other vessel without a written authority from the Commissioners.

(*b*) The time and place of bathing for persons of each sex in places provided or set apart for bathing purposes—

Place of bathing set apart for persons of either sex.

1. No person of one sex shall bathe in or otherwise use any bathing place belonging to and set apart by the Commissioners for the use of persons of the other sex.

Diseased persons not to bathe in tanks.

2. No person suffering from leprosy or any contagious disease shall bathe in or otherwise use any bathing place belonging to the Commissioners.

Committing nuisance not allowed in any bathing place.

3. No person shall commit a nuisance by obeying a call of nature in any bathing place belonging to the Commissioners.

(*c*) The deposit, whether in the public streets or otherwise, of rubbish and offensive matter, the removing and carrying away of the same, and charging the person responsible for such deposit with the expenses of removing it—

Dust, dirt, ashes, kitchen or stable refuse not to be deposited in streets except as the Commissioners shall direct.

1. Where the provisions of section 298, Act II (B.C.) of 1888, have been complied with by the Commissioners, no person, the entrance to whose premises is within 50 yards of a dust-box, shall deposit, or cause to be deposited, any offensive matter or rubbish in any public street except in the dust-bin or box provided by the Commissioners. If such box or bin is full, the offensive matter or rubbish may be deposited by the side of it.

---

* The bye-laws are grouped for convenience under the heads of the several sub-sections of section 412, but it is not thereby meant that this sub-section is the sole authority for each bye-law. A bye-law is passed sometimes partly under the authority of one sub-section, partly of another, partly of the general provision at the end of the section. If any question therefore is raised as to whether any bye-law is authorised by the sub-section under which it is placed, it must be understood that its validity must be tried under all the provisions of section 412 before it is declared *ultra vires*.

Dust, dirt, ashes, &c., not to be deposited where the provisions of section 298 have not been complied with except between such hours as may be determined by the Commissioners.

2. Where the provisions of section 298 of Act II (B. C.) of 1888 have not been complied with, no person shall deposit, or allow to be deposited, in any public street any offensive matter or rubbish except between such hours as may from time to time be determined by the Commissioners in meeting, and duly notified to the public.

Tank, hole, or excavation not to be dug in Calcutta without permission.

3. No person shall dig, or allow to be dug, in Calcutta any cesspool, tank, well or pit, or any excavation for the purpose of taking earth therefrom or for storing offensive matter or rubbish without the special permission of the Commissioners.

Refuse resulting from any business or trade to be removed under half-yearly permits.

4. Every person who shall exercise in Calcutta any of the professions, trades, or callings prescribed in the following schedule (Rule 7) shall take out a half-yearly permit and pay to the Commissioners such sum as may be due by him according to the rates mentioned in the said schedule for the removal and carrying away of offensive matter or rubbish resulting from such business, trade, profession or calling.

Discretion of the Commissioners to refund or remit whole or portion of the amount payable for removal of business or trade refuse

5 The Commissioners may in their discretion remit or refund the whole, or such portion thereof as they may think fit, of the amount so payable if they are satisfied that any such person removes the offensive matter or rubbish himself, or has exercised any such business, trade, profession or calling for a portion of the half-year only.

Permit shall be for six months, commencing in April and October in each year.

6. Such permit shall be for a period of six months commencing in April and October in each year—and shall be taken out not latter than the 1st of June and the 1st of December in that year.

Road Cess Notification.

DISTRICT PUBNA.

IT is hereby notified that under section 38 of the Cess Act, as amended by the second schedule of the Local Self-Government Act III (B.C.) of 1885, the District Board of Pubna have determined that road cess in that district for the cess year 1890-91 shall be levied at the maximum rate, viz., one-half anna on each rupee of the annual value of lands, and of the annual net profits from mines, quarries, tramways, railways and other immoveable property as enumerated in section 6 of the Cess Act.

W. FIDDIAN, Chairman.

Road Cess Notification.

IT is hereby notified for general information that, under section 46 of the Bengal Local Self-Government Act No. III (B.C.) of 1885, the District Board of Shahabad have, by a resolution of their meeting held on the 13th of January 1890, determined to levy road cess for the year 1890-91 at the maximum rate of six pies in the rupee on the annual value of lands, mines, &c.

S. M. NASSIRUDDIN, Vice-Chairman, District Board, Shahabad.

Dated Arrah, the 18th January 1890.

Dinagepore District Board.

SIX PER CENT. LOAN.

THE Dinagepore District Board have resolved, with the permission of the Lieutenant-Governor of Bengal, to borrow Rs. 10,000 (out of two lakhs of rupees) during the current financial year (1889-90) for construction of permanent bridges in their district roads on security of the District Fund formed under Act III (B.C.) of 1885, detailed accounts of which for last two years were published in the *Calcutta Gazette*, Part IB, page 164, dated 7th August 1889.

2. Tenders for the whole or any part of the said amount of Rs. 10,000 will be received by the Vice-Chairman of the Board from this date to Friday, the 31st January 1890. Tenders must be in sums of Rs. 500) or multiples of Rs 500.

3. Each tender must be addressed in the form annexed herewith to the Vice-Chairman, and enclosed in a closed and sealed cover superscribed "Tender for Loan." If the tenderer is not resident in India, he must name an agent resident in India, to whom a letter of allotment may be issued if any part of the loan is allotted to such tenderer.

4. Each tender must be accompanied by deposit money, at a rate of 5 per cent. on the amount tendered, to be sent by postal money-order, and the money-order receipt must be filed with the tender. Deposits will, in the case of accepted tenders, be credited proportionally in part payment of the allotment certificates issued in respect of the tender. If any allotment certificate is not fully taken up, the deposit will be forfeited.

5. The rate at which a tender is made must not contain a fraction of an anna: if a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out, and the tender treated as if the rate did not contain such fraction of an anna.

6. The rate at which each tender is made must be specified in rupees, or rupees and annas. A tender in which no rate is thus specified, but a subscription is offered in some other terms, *e.g.*, at the recorded minimum, or at some specified percentage in addition to the recorded minimum, or at the average of the accepted tenders, will be rejected as null and void.

7. Tenders will be opened publicly by the Vice-Chairman at the Dinagepore Magistracy on Saturday, the 1st February next, at noon (Calcutta time).

8. Tenders at the minimum rate will be accepted in the order of the rates tendered, beginning with the highest rate. The amount allotted at the lowest rate at which tenders are accepted will be divided amongst those who have tendered at this rate in proportion, as nearly as may be found convenient, to the amounts of their tenders, provided that no allotment will be issued if the amount distributable on any tender is less than Rs. 500.

9. To each tenderer (or to his agent) whose tender is accepted in whole or in part, such number of allotment certificates as may be necessary to make up the aggregate amount allotted to him will be issued by the Vice-Chairman as soon as possible after the tenders have been accepted, and a list of the names of those to whom such allotment certificates are issued will be posted for general information at the District Board's Office.

10. Payment of any allotment certificate is to be made in credit of the District Fund at the Dinagepore Treasury.

Form of Tender

I, A. B., hereby tender for Rs. (Rs.) of the six per cent. loan advertised in the *Calcutta Gazette*, dated , and agree to pay for the same subject to the condition mentioned in the advertisement, at the rate of Rs. As. for every hundred rupees allotted to me.

I enclose a money-order receipt for deposit money for Rs sent to the address of the Vice-Chairman of the Dinagepore District Board.

Any allotment made to me may be communicated to at

NOTE.—A separate tender must be made at each rate tendered. The rate tendered should be the whole amount per centum, not the premium or discount; thus "one hundred and two" or "one hundred," or "ninety-nine," not "two per cent. premium" or "par" or "one per cent. discount."

NOTICE.

IT is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,
Under-Secy. to the Govt. of Bengal.
The 24th November 1886.

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876 :—

Terms of subscription payable annually in advance.

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 16th January, 1890:—

No. 2 of 1890.

A Bill for the Prevention of Cruelty to Animals.

WHEREAS it is expedient to make further provision for the prevention of cruelty to animals; It is hereby enacted as follows:—

Title, extent and commencement, and supersession of other enactments.

1. (*1*) This Act may be called the Prevention of Cruelty to Animals Act, 1890.

[Act I, 1878, s. 1.]

(*2*) This section extends to the whole of British India: the rest of this Act shall extend to such local areas as the Local Government, by notification in the official Gazette, directs, and shall come into force in each of those areas on such day as that Government, by such a notification, appoints.

[Cf. Act XII, 1886, s. 24.]

(*3*) When this Act has been extended to a local area under this section, the Local Government may direct that the whole or any part of any other enactment in force in the local area for the prevention of cruelty to animals shall, except as regards anything done or any offence committed or any fine or penalty incurred or any proceedings commenced, cease to have effect in that area, and such whole or part shall cease to have effect accordingly until the Local Government otherwise directs.

[Act I, 1868, s. 6.]

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,—

[Ben. Act I, 1869, s. 1.]

(*1*) "animal" includes a bird: and

[Act XIII, 1884, s. 2]

(*2*) "street" includes any way, road, lane, square, court, alley, passage or open space, whether a thoroughfare or not, to which the public have access, and includes also the road-way and foot-way over any public bridge or causeway.

Penalty for cruelty to animals in public places and for sale in such places of animals killed with unnecessary cruelty.

3. (*1*) If any person in any street or in any other place, whether open or closed, to which the public have access, or within sight of any person in any street or in any such other place,—

[Ben. Act I, 1869, s. 2: and Canadian 43 Vict., c. 38, s. 2.]

(*a*) cruelly and unnecessarily beats, overdrives, overloads or otherwise ill-treats any animal, or

[Canadian 43 Vict., c. 38, s. 2, and English 12 & 13 Vict., c. 92, s. 12.]

(*b*) binds or carries any animal in such a manner or position as to subject the animal to unnecessary pain or suffering, or

(*c*) offers, exposes, or has in his possession, for sale any live animal which is suffering pain by reason of mutilation, starvation or other ill-treatment, or any dead animal which has been killed in an unnecessarily cruel manner,

he shall be punished with fine which may extend to one hundred rupees, or with imprisonment for a term which may extend to six months, or with both.

[12 & 13 Vict., c. 92, s. 18.]

[Ben. Act III, 1869, s. 1: and 12 & 13 Vict., c. 92, s. 13. Cf. Act X, 1882, s. 57.]

(*2*) Subject to any rules which the Local Government may make in this behalf, a police-officer may arrest without warrant any person who in his presence commits or is accused of having committed an offence against sub-section (*1*).

Penalty for killing animals with unnecessary cruelty anywhere.

4. If any person kills any animal in an unnecessarily cruel manner, he shall be punished with fine which may extend to one hundred rupees, or with imprisonment for

[Cf. s 3 (*1*) (*c*).]

a term which may extend to six months, or with both.

[Ben. Act I, 1869, s. 5.]

Penalty for employing anywhere animals unfit for labour.

5. If any person employs in any work or labour any animal which by reason of any disease, infirmity, wound or sore is unfit to be so employed, he shall be punished with fine which may extend to one hundred rupees.

[Ben. Act I, 1869, s. 4.]

Penalty for permitting diseased animals to go at large or to die in public places.

6. If any person wilfully permits any animal of which he is the owner to go at large in any street while the animal is affected with contagious or infectious disease, or without reasonable excuse permits any diseased or disabled animal of which he is the owner to die in any street, he shall be punished with fine which may extend to fifty rupees.

[Act X, 1882, s. 98, and 39 & 40 Vict. c. 77, s. 13.]

Search-warrants.

7. (*1*) If a District Magistrate, Subdivisional Magistrate, Presidency Magistrate or Magistrate of the first class, upon information and after such inquiry as he thinks necessary, has reason to believe that an offence against section 4 or section 5 is being or has been committed, he may by his warrant authorise any police-officer above the rank of a constable to enter and search any place specified in the warrant and to seize any animal, alive or dead, in respect of which such police-officer has reason to believe that the offence is being or has been committed.

(*2*) The provisions of the Code of Criminal Procedure, 1882, relating to searches under that Code shall, so far as those provisions can be made applicable, apply to a search in pursuance of a warrant issued under sub-section (*1*). X of 1882.

[Canadian 32 & 33 Vi c. 27, s. 6, a English 12 13 Vict., c. s. 14.]

Limitation for prosecutions.

8. A prosecution for an offence against this Act shall not be instituted after the expiration of three months from the date of the commission of the offence.

STATEMENT OF OBJECTS AND REASONS.

IN different parts of British India there are more than twenty enactments in force relating to cruelty to animals, but the local extent of most of these enactments is very limited, while the necessity imposed by others of proving cruelty to an animal to have caused obstruction, inconvenience, annoyance, risk, danger or damage to the public renders it very difficult to maintain a prosecution.

The object of the present Bill is to provide an easily enforceable law which may be applied by any Local Government to any part of the territories under its administration, either in addition to, or to the exclusion of, any other enactment in force in such part for the suppression of cruelty to animals.

The 15th January, 1890.

PHIL. P. HUTCHINS.

S. HARVEY JAMES,
Secretary to the Government of India.

24	Tipperah „ 18, '90	Nil	Weather—seasonable. Winter crops thriving well. *Boro* paddy is being transplanted.
25	Chittagong Hill Tracts. „ 17, '90	Nil	Weather—very cold. Foggy up to 10 a.m. in the morning. Tobacco, mustard, and chillies progressing. Outturn of cotton crop only four annas.
	Hill Tipperah Jan. 18, '90	Nil	Weather—rather a little warm for the season. Harvesting of *amun* paddy nearly over. Mustard is being gathered. Tobacco and chillies doing well.
BEHAR.			
Patna Divn.			
26	Patna „ 18, '90	Nil	Weather—cold. *Rubbi* crops progressing well, but rain is wanted. Mustard promising. Prospects of poppy favourable. Prices of food-grains almost stationary.
27	Gya „ 18, '90	Nil	Weather—seasonable. Harvesting of paddy continues. *Rubbi* and poppy doing well, but rain is wanted in some places. Food-stocks sufficient.
28	Shahabad „ 18, '90	Nil	Weather—inclined to be cloudy and uncertain. Prospects of all *rubbi* crops and poppy remain excellent. A little rain might do good. Prices stationary.
29	Durbhunga „ 18, '90	Nil	Weather—mornings foggy and occasionally cloudy. Rain has seemed probable for the last two days. Prospects of *rubbi* continue favourable, but rain would be of immense good to the crop. Poppy is reported to be good, but caterpillars have appeared in some places. Tobacco is approaching maturity: probably an average crop. Fields are being prepared for indigo. Price of common rice ranges from 19½ to 21 seers per rupee.
30	Mozufferpur „ 18, '90	Nil	Weather—slightly cloudy during the week. All standing crops doing very well. Mustard very promising. Poppy slightly damaged by caterpillars, but prospects continue good in Sudder. Hajipur poppy report not received.
31	Sarun „ 18, '90	Nil	Weather—cold and clear, and occasionally cloudy *Rubbi* crops are doing well. Prospects of poppy continue good. Sugarcane pressing is in full swing.
32	Chumparun „ 18, '90	Nil	Weather—cold. *Rubbi* growing well and promising a good harvest. Early sowings of poppy in blossom. Clouds keep hovering about now and then. A slight rainfall would do good to both the crops.
Bhagulpore Divn.			
33	Monghyr „ 18, '90	Nil	Weather—seasonable. *Rubbi* crops progressing. Poppy doing well.
34	Bhagulpur „ 18, '90	Nil	Weather—too warm for the season. Late rice harvest over; outturn in the two northern subdivisions, after allowing for loss from floods, is estimated at 14 annas, and in the southern subdivision 11 annas. Area under wheat about up to average, but the crop wants rain, and prospects of other *rubbi* crops are going off also.
35	Purneah „ 18, '90	Nil	Weather—not cold enough for the time of the year. *Aghani* rice harvested; a good average crop. Tobacco prospects on the whole good; in some places want of rain has affected the crop. *Rubbi* crops doing well.
36	Maldah „ 18, '90	Nil	Weather—rather hot for the season. Harvesting of winter rice nearly over; outturn is expected to average about 12 annas. *Kalai* and mustard are being reaped and threshed. Transplantation of *boro* begun. Wheat thriving and coming into ear. Other standing crops doing well. Common rice selling at an average of 16¾ seers per rupee.
37	Sonthal Perghs. „ 18, '90	Nil	Weather—bright and cool. Rice harvest may be considered over; outturn almost average. *Rubbi* crops doing well.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38 Cuttack	Jan. 18, '90	Nil	Weather—seasonable. Reaping of *guru sarad* and early *rubbi* continues.
	39 Pooree	„ 17, '90	Nil	Weather—seasonable. Harvesting of the winter crop (late *sarad*) still continues. *Mung* is being sown, and other miscellaneous crops of the season are doing well. Prices of common rice stationary.
	40 Balasore	„ 18, '90	Nil	Weather—seasonable. Rice harvest now over. *Rubbi* yields an outturn of about 11 annas.
CHOTA NAGPORE.				
	South-West Frontier Agency.			
Chota Nagpore Divn.	41 Hazaribagh	Jan. 18, '90	Nil	Weather—seasonable. Prospects of crops generally good. Poppy crop in prime condition.
	42 Lohardugga	„ 18, '90	Nil	Weather—seasonable. Prospects of *rubbi* crops good, but some rain is wanted.
	43 Singbhoom	„ 18, '90	Nil	Weather—seasonable. Prospects of *rubbi* crops favourable. Sugarcane outturn full.
	44 Manbhoom	„ 18, '90	Nil	Weather—seasonable. *Rubbi* crops doing well, but rain is wanted.
